NexPoint Strategic Opportunities Fund

Annual Report December 31, 2020

Beginning on January 1, 2021, as permitted by regulations adopted by the U.S. Securities and Exchange Commission, paper copies of the Company's annual and semi-annual shareholder reports will no longer be sent by mail, unless you specifically request paper copies of the reports. Instead, the reports will be made available on the Company's website (nexpointgroup.com), and you will be notified by mail each time a report is posted and provided with a website link to access the report.

If you already elected to receive shareholder reports electronically, you will not be affected by this change and you need not take any action. You may elect to receive shareholder reports and other communications from the Company electronically by contacting your financial intermediary (such as a broker dealer or bank) or, if you are a direct investor, by contacting the Company's transfer agent at 1-844-485-9167.

You may elect to receive all future reports in paper free of charge. If you invest through a financial intermediary, you can contact your financial intermediary to request that you continue to receive paper copies of your shareholder reports. If you invest directly with the Company, you can call 1-844-485-9167 to let the Company know you wish to continue receiving paper copies of your shareholder reports. Your election to receive reports in paper will apply to all funds held in your account if you invest through your financial intermediary or all funds held with the Fund Complex if you invest directly with the Company.

Privacy Policy

We recognize and respect your privacy expectations, whether you are a visitor to our web site, a potential shareholder, a current shareholder or even a former shareholder.

Collection of Information. We may collect nonpublic personal information about you from the following sources:

- **Account applications and other forms, which may include your name, address and social security number, written and electronic correspondence and telephone contacts;**
- **Web site information, including any information captured through the use of “cookies”;** and
- **Account history, including information about the transactions and balances in your accounts with us or our affiliates.**

Disclosure of Information. We may share the information we collect with our affiliates. We may also disclose this information as otherwise permitted by law. We do not sell your personal information to third parties for their independent use.

Confidentiality and Security of Information. We restrict access to nonpublic personal information about you to our employees and agents who need to know such information to provide products or services to you. We maintain physical, electronic and procedural safeguards that comply with federal standards to guard your nonpublic personal information, although you should be aware that data protection cannot be guaranteed.

Economic and market conditions change frequently.
There is no assurance that the trends described in this report will continue or commence.

PORTFOLIO MANAGER COMMENTARY (unaudited)

December 31, 2020

NexPoint Strategic Opportunities Fund

During 2020, the NexPoint Strategic Opportunities Fund (the “Company”, NYSE:NHF) returned -8.60% on net asset value (“NAV”) and -33.42% of market value, including reinvested dividends, compared to a total return of 6.34% for the Credit Suisse Hedge Company Index and 6.79% for the HFRX Global Hedge Company Index during the same period. Top contributors to performance included market hedges. The largest detractors to performance included real estate positions in hospitality and office.

NHF	1 Year	3 Year	5 Year	Inception to Date
NAV	-8.60%	4.11%	25.36%	78.53%
Market Price	-33.42%	-36.73%	2.49%	8.50%

On August 28, 2020, shareholders approved the proposal to convert the Company from a registered investment company to a diversified real estate investment trust (“REIT”). The Company will begin to transition its business and investments to those of a diversified REIT. With the conversion, NHF will be the fourth publicly traded REIT on the NexPoint platform. We believe converting the Company to a REIT provides several benefits to shareholders including: 1) The potential to provide investors with a superior risk adjustment return compared to equity, fixed income, and distressed debt markets through real estate investments over the next decade. 2) Potential to reduce the Company’s historical discount to net asset value. 3) Potential to provide greater liquidity for shareholders. 4) Opportunity to take advantage of the current dislocation in the commercial real estate markets. 5) Potential to position the Company’s assets to earn greater income for the Company in a historically low interest rate environment.

On January 8, 2021, NHF successfully completed its tender offer to purchase the Company’s common shares in exchange for consideration consisting of approximately 20% cash and 80% newly issued 5.50% Series A Cumulative Preferred Shares. The Company purchased 8,750,121 shares at a price of \$12.00 per share.

Portfolio Highlights

Despite the challenges in 2020, we maintain high conviction in the Company’s portfolio. In particular, we believe the Company’s allocation to opportunistic, durable, and defensive real estate makes it well positioned both in the current environment and over the long term. We believe the real estate sector has the potential to generate the best risk-adjusted return of any sector over the next several years, and the current portfolio composition reflects our constructive outlook in the space.

We recognize that this outlook is not captured in the Company’s share price relative to its NAV. The Company has been trading at a significant discount, which significantly widened in the first quarter. We believe the Company’s trading value is a result of factors that existed prior to the pandemic (described more below); the issues plaguing the markets in Q1 only added to those challenges.

As of December 31, 2020, over sixty-six percent of the portfolio was invested in real estate. NexPoint’s real estate team has continued to drive growth at the firm and has completed more than \$11 billion in gross real estate transactions since inception. The team invests across multiple property types, with experience in multifamily, single-family rentals, office, self-storage, life sciences, and hospitality, among other areas. Our real estate investment capabilities include debt, equity, agency mortgage-backed securities (“MBS”), direct origination, structured credit/preferred, and opportunistic and tax-advantaged transactions. Our real estate investments are held in a number of funds and investment vehicles across our platform. The following provides information on the Company’s top real estate holdings:

The Company’s largest holding is NexPoint Real Estate Opportunities, LLC (“NREO”), a wholly owned REIT comprised of direct real estate investments. These include investments in self-storage and single-family rentals, which we believe are well-positioned in today’s environment, as well as an office property that we believe represents long-term potential.

NREO owns an interest in VineBrook Homes Trust, Inc. (“VineBrook”) a nontraded REIT advised by NexPoint. VineBrook Homes, LLC (the manager) owns and operates a portfolio of approximately 14,000 single-family rental (“SFR”) homes in 19 markets across the Midwest, Heartland, and Southeast. The average monthly rent is approximately \$1,000, providing affordable, safe, and clean homes for the workforce demographic. The SFR space is among the areas of real estate that has performed well during the pandemic.

Cityplace Tower (“Cityplace”) is a 42-story, 1.35 million-square-foot, trophy office building acquired in 2018. The building is adjacent to the Uptown submarket in Dallas, Texas. The prior owners were unwilling to invest significant capital to keep up with the property’s competitive set. For example, due to prior ownership, Cityplace was budgeted to average approximately \$14/square foot in triple net lease (“NNN”) rent equivalent during 2019. Similar office assets in the Uptown submarket in Dallas are achieving average NNN rents of \$30/square foot. Plans include significant capital investments to bring class-A amenities to the property and reposition the asset, providing the potential to achieve higher rental rates in both the office and retail spaces. Since the 2018

PORTFOLIO MANAGER COMMENTARY (unaudited)

December 31, 2020

NexPoint Strategic Opportunities Fund

acquisition, the property announced plans to establish a 223-key, five-star hotel within the building, operated by InterContinental Hotels Group. The hotel will occupy eight of the building's 42 floors and will contain a restaurant, full bar, and lounge. The hotel is slated to open in early 2023 and is expected to more than double Net Operating Income ("NOI") of the building once stabilized.

The Company's second largest holding is NexPoint Storage Partners ("NSP"). NSP is a nearly \$1.1 billion storage platform originating from NexPoint's investments in the publicly traded self-storage REIT Jernigan Capital. Jernigan initially focused on development financing but gradually expanded the business model to include outright ownership of facilities through a complementary acquisition strategy. In November 2020, NexPoint completed the acquisition of Jernigan in a take-private transaction valued at approximately \$1 billion and subsequently launched NexPoint Storage Partners as a dedicated platform for the self-storage sector. The platform consists of 69 self storage investments across the US, of which 38 are wholly-owned. NexPoint Storage targets Generation V or "GenV" facilities in major metropolitan areas across the US. GenV facilities are vertical buildings, and include heating/air condition, WiFi, LED lighting and advanced security systems. A key Partner is Extra Space Storage, who will manage all wholly owned facilities and also provided financing in the acquisition.

The Company also has invested in another self-storage company, Safstor, which is held in a wholly owned REIT, NexPoint Real Estate Capital, LLC. SafStor owns, develops, and redevelops single- and multistory self-storage properties in undersupplied markets with high barriers to entry. The company seeks markets that offer low delinquency, high traffic count, and high population growth, with above-average household income. Property management is performed by reputable operators such as Extra Space Storage and CubeSmart. As of December 31, 2020, Safstor has completed seven individual storage facilities that are currently in lease up. An additional 22 projects are in the construction and planning phases, with completions expected through the next two years. The projected weighted average yield on cost is 8.6% for all SafStor properties. Stabilized cap rates for similar properties average approximately 5.0% - 5.5%, reflecting the potential for SafStor properties to see significant increases in value once stabilized. Additionally, we expect appreciation of the storage portfolio once development is complete.

Self-storage has widely been viewed as recession resistant due to strong relative performance in previous recessions. 2020 was no different as the asset class proved to be a safe haven while self-storage total returns have outperformed most sectors since the pandemic started to disrupt financial markets in February 2020.

The Company maintains a minimal amount of exposure to Hospitality. NexPoint funded the development of an upscale Marriott hotel in the heart of the Uptown submarket of Dallas, Texas. Upon completion, the hotel will boast 255 upscale guestrooms with approximately 13,000 square feet of meeting space. The hotel aims to fill a void in the immediate submarket, which lacks an affordable, quality hotel for the business traveler. The hotel opened in February 2021. Currently, the only major hotels in the general vicinity are five-star, luxury hotels. The Uptown area of Dallas is known for attracting young professionals, as well as business travelers due to the proximity to the many businesses in Uptown and Downtown. Uptown has a vibrant bar and restaurant scene, as well as a 9-mile walking and biking trail and several large parks. College students at nearby Southern Methodist University are also known to live in the area. Once complete, the hotel will contain high-class amenities built to attract young adults and business travelers alike, such as a rooftop pool lounge, as well as bars and restaurants featuring celebrity chefs. Dallas Love-Field Airport is also less than five miles away.

The Company's investment in Creek Pine Holdings continues to perform well. We originally invested in the asset in May 2018 as a participating preferred investor in a joint venture with a consortium of institutional investors led by Catchmark Timber Trust (ticker: CTT). The asset comprises 1.1 million acres of prime East Texas timberlands. The timberlands are located near top quartile mills and within approximately 100 miles of three of the top five U.S. homebuilding markets; Austin, Dallas, and Houston. These markets provide strong, growing, and compelling demand fundamentals. The joint venture assumes long-term sawtimber and pulpwood supply agreements with Georgia-Pacific and International Paper.

On June 24, 2020, Catchmark announced that the joint venture has amended its wood supply agreement with Georgia Pacific intended to achieve market-based pricing on timber sales. Under the amended supply agreement, the asset will also be able to increase reimbursement for extended haul distances, sell timber to other third parties, and expand its ability to sell large timberland parcels to third party buyers. The supply agreement with Georgia Pacific has also been extended by two years, with optimized harvest volume obligations to enhance and preserve long-term value. Speaking of the transaction, Catchmark CEO, Brian Davis, said "we expect these amendments to increase cash flows from timber sales at market-based prices based on customary pricing mechanisms, improve the value and marketability of the property for the long-term, and significantly enhanced the investments ability to make opportunistic timberland sales as well as recapitalize our investment." John Rasor at Catchmark added "our operations can now realize the full potential of the investments premier timberland holdings to optimize future cash flow and value." The Amended and Restated Joint Venture Agreement further provides for an increase in the 10.25% cumulative return on the

December 31, 2020

NexPoint Strategic Opportunities Fund

preferred investors' interests in Triple T's subsidiary real estate investment trust of 0.5% per quarter, subject to a maximum increase of 2.0% and subject to decrease in other circumstances. This is very positive news and renegotiation of this agreement has been central to our investment thesis.

On February 11, 2020, as part of the formation transaction for NexPoint Real Estate Finance (NYSE:NREF), certain assets held in NHF, were contributed in exchange for operating partnership units of NREF. The NREF OP Units are convertible one-to-one for NREF Common shares and therefore are priced daily. NexPoint Real Estate Finance is a publicly traded mortgage REIT listed on the New York Stock Exchange under the symbol "NREF". The company primarily concentrates on investments in real estate sectors where its senior management team has operating expertise, including multifamily, SFR, and self-storage, predominantly in the top 50 metropolitan statistical areas. The company focuses on lending or investing in properties that are stabilized or have a "light-transitional" business plan.

The Company's Strategy

The NexPoint Strategic Opportunities Fund (NYSE:NHF) ("NHF" or the "Company") is a closed-end investment company managed by NexPoint Advisors, L.P. that is in the process of converting to a diversified REIT. On August 28, 2020, shareholders approved the Conversion proposal and amended the Company's fundamental investment policies and restrictions to permit the Company to pursue its new business. The Company is in the process of realigning its portfolio so that it is no longer an "investment company" under the Investment Company Act of 1940 (the "1940 Act") and continues to expect the Company to be able to transition its investment portfolio sufficient to qualify as a REIT for tax purposes by the first quarter of 2021 and to apply to the Securities and Exchange Commission (the "SEC") for an order under the 1940 Act declaring that the Company has ceased to be an investment company (the "Deregistration Order") in the first half of 2021.

⁽¹⁾ Quality is calculated as a percentage of total bonds & notes. Sectors and holdings are calculated as a percentage of total net assets. The quality ratings reflected were issued by Standard & Poors, a nationally recognized statistical rating organization. Ratings are measured on a scale that generally ranges from AAA (highest) to D (lowest). Quality ratings reflect the credit quality of the underlying bonds in the Company's portfolio and not that of the Company itself. Quality Ratings are subject to change.

⁽²⁾ Sectors and holdings are calculated as a percentage of total net assets.

A guide to understanding each Company's financial statements

Investment Portfolio	The Investment Portfolio details all of the Company's holdings and its market value as of the last day of the reporting period. Portfolio holdings are organized by type of asset and industry to demonstrate areas of concentration and diversification.
Statement of Assets and Liabilities	This statement details the Company's assets, liabilities, net assets and share price for each share class as of the last day of the reporting period. Net assets are calculated by subtracting all of the Company's liabilities (including any unpaid expenses) from the total of the Company's investment and noninvestment assets. The net asset value per share for each class is calculated by dividing net assets allocated to that share class by the number of shares outstanding in that class as of the last day of the reporting period.
Statement of Operations	This statement reports income earned by the Company and the expenses incurred by the Company during the reporting period. The Statement of Operations also shows any net gain or loss the Company realized on the sales of its holdings during the period as well as any unrealized gains or losses recognized over the period. The total of these results represents the Company's net increase or decrease in net assets from operations.
Statements of Changes in Net Assets	This statement details how the Company's net assets were affected by its operating results, distributions to shareholders and shareholder transactions (e.g., subscriptions, redemptions and distribution reinvestments) during the reporting period. The Statements of Changes in Net Assets also details changes in the number of shares outstanding.
Statement of Cash Flows	This statement reports net cash and foreign currency provided or used by operating, investing and financing activities and the net effect of those flows on cash and foreign currency during the period.
Financial Highlights	The Financial Highlights demonstrate how the Company's net asset value per share was affected by the Company's operating results. The Financial Highlights also disclose the classes' performance and certain key ratios (e.g., net expenses and net investment income as a percentage of average net assets).
Notes to Financial Statements	These notes disclose the organizational background of the Company, certain of its significant accounting policies (including those surrounding security valuation, income recognition and distributions to shareholders), federal tax information, fees and compensation paid to affiliates and significant risks and contingencies.

- (a) Non-income producing security.
- (b) Securities with a total aggregate value of \$653,004,227, or 82.6% of net assets, were classified as Level 3 within the three-tier fair value hierarchy. Please see Notes to Financial Statements for an explanation of this hierarchy, as well as a list of unobservable inputs used in the valuation of these instruments.
- (c) Represents fair value as determined by the Company's Board of Trustees (the "Board"), or its designee in good faith, pursuant to the policies and procedures approved by the Board. The Board considers fair valued securities to be securities for which market quotations are not readily available and these securities may be

NexPoint Strategic Opportunities Fund

valued using a combination of observable and unobservable inputs. Securities with a total aggregate value of \$653,004,227, or 82.6% of net assets, were fair valued under the Company's valuation procedures as of December 31, 2020. Please see Notes to Financial Statements.

- (d) Affiliated issuer. Assets with a total aggregate market value of \$615,855,868, or 77.9% of net assets, were affiliated with the Company as of December 31, 2020.
- (e) Perpetual security with no stated maturity date.
- (f) There is currently no rate available.
- (g) Securities exempt from registration under Rule 144A of the 1933 Act. These securities may only be resold in transaction exempt from registration to qualified institutional buyers. The Board has determined these investments to be illiquid. At December 31, 2020, these securities amounted to \$90,072,452 or 11.4% of net assets.
- (h) Senior loans (also called bank loans, leveraged loans, or floating rate loans) in which the Company invests generally pay interest at rates which are periodically determined by reference to a base lending rate plus a spread (unless otherwise identified, all senior loans carry a variable rate of interest). These base lending rates are generally (i) the Prime Rate offered by one or more major United States banks, (ii) the lending rate offered by one or more European banks such as the London Interbank Offered Rate ("LIBOR") or (iii) the Certificate of Deposit rate. As of December 31, 2020, the LIBOR USD 1 Month and LIBOR USD 3 Month rates were 0.14% and 0.24%, respectively. Senior loans, while exempt from registration under the Securities Act of 1933, as amended (the "1933 Act"), contain certain restrictions on resale and cannot be sold publicly. Senior secured floating rate loans often require prepayments from excess cash flow or permit the borrower to repay at its election. The degree to which borrowers repay, whether as a contractual requirement or at their election, cannot be predicted with accuracy. As a result, the actual remaining maturity maybe substantially less than the stated maturity shown.
- (i) The issuer is, or is in danger of being, in default of its payment obligation.
- (j) Represents value held in escrow pending future events. No interest is being accrued.
- (k) Variable or floating rate security, the interest rate of which adjusts periodically based on changes in current interest rates and prepayments on the underlying pool of assets.
- (l) Interest only security ("IO"). These types of securities represent the right to receive the monthly interest payments on an underlying pool of mortgages. Payments of principal on the pool reduce the value of the "interest only" holding.
- (m) Step Bonds—Represents the current rate, the step rate, the step date and the final maturity date.
- (n) No dividend payable on security sold short.
- (o) As of December 31, 2020, \$1,856,726 in cash was segregated or on deposit with the brokers to cover investments sold short and is included in "Other Assets & Liabilities, Net".
- (p) Restricted Securities. These securities are not registered and may not be sold to the public. There are legal and/or contractual restrictions on resale. The Company does not have the right to demand that such securities be registered. The values of these securities are determined by valuations provided by pricing services, brokers, dealers, market makers, or in good faith under the procedures established by the Board. Additional Information regarding such securities follows:

Restricted Security	Security Type	Acquisition Date	Cost of Security	Fair Value at Period End	Percent of Net Assets
Metro-Goldwyn-Mayer, Inc.	Common Stock	12/20/2010	\$13,929,926	\$26,894,919	3.40%
TerreStar Corporation	Common Stock	3/16/2018	\$34,089,464	\$43,813,706	5.54%

(a) Net investment income (loss) per share was calculated using average shares outstanding during the period.

(b) Includes non-recurring dividend from NexPoint REIT.

(c) Less than 0.005%.

(d) Shares issued at a discount to NAV. The per share impact was derived by computing (A) the number of shares issued times (B) the difference between the net proceeds per share and NAV divided by (C) the total shares outstanding following the share issuance.

(e) Based on market value per share. Distributions, if any, are assumed for purposes of this calculation to be reinvested at prices obtained under the Company's Dividend Reinvestment Plan.

(f) Supplemental expense ratios are shown below:

(g) Excludes in-kind activity

(h) Represents the total dollar amount of commissions paid on portfolio transactions divided by total number of portfolio shares purchased and sold for which commissions were charged

NexPoint Strategic Opportunities Fund

Note 1. Organization

NexPoint Strategic Opportunities Fund (the “Company”) is a Delaware statutory trust and is registered with the U.S. Securities and Exchange Commission (the “SEC”) under the Investment Company Act of 1940, as amended (the “1940 Act”), as a non-diversified, closed-end management investment company. This report includes information for the year ended December 31, 2020. The Company trades on the New York Stock Exchange (“NYSE”) under the ticker symbol NHF. The Company may issue an unlimited number of common shares, par value \$0.001 per share (“Common Shares”). The Company commenced operations on June 29, 2006. NexPoint Advisors, L.P. (“NexPoint” or the “Investment Adviser”), an affiliate of Highland Capital Management Company Advisors, L.P. (“Highland”), is the investment adviser and administrator to the Company.

On October 25, 2019, the Board of the Fund authorized the repurchase of up to \$25 million of the Fund’s shares over a six-month period. Under this program, the Fund repurchased 414,604 shares through April 2020, at an average price of \$8.67, for a total investment of \$3.6 million. Upon retirement of the repurchased shares, the net asset value was \$6.8 million, or \$16.61 per share.

On April 24, 2020, the Company’s Board of Trustees (the “Board”) authorized the repurchase of up to 10% of the Company’s shares over a twelve-month period. Under this program, the Company repurchased 98,600 shares through December 31, 2020, at an average price of \$10.18, for a total investment of \$1.0 million. Upon retirement of the repurchased shares, the net asset value was \$1.8 million, or \$17.51 per share. The Company’s share repurchase program was superseded as of October 13, 2020, when the Board approved the Exchange Offer (defined below).

On August 28, 2020, shareholders of the Company approved a proposal to convert the Company into a real estate investment trust (a “REIT”) and amended the Company’s fundamental investment policies and restrictions to permit the Company to pursue its new business. The Company is in the process of realigning its portfolio so that it is no longer an investment company under the 1940 Act and continues to expect the Company to be able to transition its investment portfolio sufficient to qualify as a REIT for tax purposes by the first quarter of 2021. NexPoint expects to apply to the SEC for an order under the 1940 Act declaring that the Company has ceased to be an investment company in the first quarter of 2021.

On October 30, 2020, the Company announced the commencement of a tender offer to purchase the Company’s common shares (“Common Shares”) in exchange for consideration consisting of approximately 20% cash and 80% newly-issued 5.50% Series A Cumulative Preferred Shares,

liquidation preference \$25.00 per share (“Series A Preferred Shares”) (collectively, the “Exchange Offer”). The Exchange Offer expired on January 4, 2021.

Note 2. Significant Accounting Policies

The following summarizes the significant accounting policies consistently followed by the Company in the preparation of its financial statements.

Use of Estimates

The Company is an investment company that follows the investment company accounting and reporting guidance of Financial Accounting Standards Board (“FASB”) Accounting Standards Codification (“ASC”) Topic 946 *Financial Services – Investment Companies* applicable to investment companies. The Company’s financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America (“GAAP”), which require the Investment Adviser to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of increases or decreases in net assets from operations during the reporting period. Changes in the economic environment, financial markets and any other parameters used in determining these estimates could cause actual results to differ materially.

Company Valuation

The net asset value (“NAV”) of the Company’s common shares is calculated daily on each day that the NYSE is open for business as of the close of the regular trading session on the NYSE, usually 4:00 PM, Eastern Time. The NAV is calculated by dividing the value of the Company’s net assets attributable to common shares by the numbers of common shares outstanding.

Valuation of Investments

The Company’s investments are recorded at fair value. In computing the Company’s net assets attributable to its common shares, securities with readily available market quotations on the NYSE, National Association of Securities Dealers Automated Quotation (“NASDAQ”) or other nationally recognized exchange, use the closing quotations on the respective exchange for valuation of those securities. Securities for which there are no readily available market quotations will be valued pursuant to policies adopted by the Board. Typically, such securities will be valued at the mean between the most recently quoted bid and ask prices provided by the principal market makers. If there is more than one such principal market maker, the value shall be the average of such means. Securities without a sale price or quotations from principal market makers on the valuation

December 31, 2020

NexPoint Strategic Opportunities Fund

day may be priced by an independent pricing service. Generally, the Company's loan and bond positions are not traded on exchanges and consequently are valued based on a mean of the bid and ask price from the third-party pricing services or broker-dealer sources that the Investment Adviser has determined to have the capability to provide appropriate pricing services which have been approved by the Board.

Securities for which market quotations are not readily available, or for which the Company has determined that the price received from a pricing service or broker-dealer is "stale" or otherwise does not represent fair value (such as when events materially affecting the value of securities occur between the time when market price is determined and calculation of the Company's NAV, will be valued by the Company at fair value, as determined by the Board or its designee in good faith in accordance with procedures approved by the Board, taking into account factors reasonably determined to be relevant, including, but not limited to: (i) the fundamental analytical data relating to the investment; (ii) the nature and duration of restrictions on disposition of the securities; and (iii) an evaluation of the forces that influence the market in which these securities are purchased and sold. In these cases, the Company's NAV will reflect the affected portfolio securities' fair value as determined in the judgment of the Board or its designee instead of being determined by the market. Using a fair value pricing methodology to value securities may result in a value that is different from a security's most recent sale price and from the prices used by other investment companies to calculate their NAVs. Determination of fair value is uncertain because it involves subjective judgments and estimates.

There can be no assurance that the Company's valuation of a security will not differ from the amount that it realizes upon the sale of such security. Those differences could have a material impact to the Company. The NAV shown in the Company's financial statements may vary from the NAV published by the Company as of its period end because portfolio securities transactions are accounted for on the trade date (rather than the day following the trade date) for financial statement purposes.

Fair Value Measurements

The Company has performed an analysis of all existing investments and derivative instruments to determine the significance and character of inputs to their fair value determination. The levels of fair value inputs used to measure the Company's investments are characterized into a fair value hierarchy. Where inputs for an asset or liability fall into more than one level in the fair value hierarchy, the investment is classified in its entirety based on the lowest level input that is

significant to that investment's valuation. The three levels of the fair value hierarchy are described below:

- Level 1* — Quoted unadjusted prices for identical instruments in active markets to which the Company has access at the date of measurement;
- Level 2* — Quoted prices for similar instruments in active markets; quoted prices for identical or similar instruments in markets that are not active, but are valued based on executed trades; broker quotations that constitute an executable price; and alternative pricing sources supported by observable inputs are classified within Level 2. Level 2 inputs are either directly or indirectly observable for the asset in connection with market data at the measurement date; and
- Level 3* — Model derived valuations in which one or more significant inputs or significant value drivers are unobservable. In certain cases, investments classified within Level 3 may include securities for which the Company has obtained indicative quotes from broker-dealers that do not necessarily represent prices the broker may be willing to trade on, as such quotes can be subject to material management judgment. Unobservable inputs are those inputs that reflect the Company's own assumptions that market participants would use to price the asset or liability based on the best available information.

The Investment Adviser has established policies and procedures, as described above and approved by the Board, to ensure that valuation methodologies for investments and financial instruments that are categorized within all levels of the fair value hierarchy are fair and consistent. A Pricing Committee has been established to provide oversight of the valuation policies, processes and procedures, and is comprised of personnel from the Investment Adviser and its affiliates. The Pricing Committee meets monthly to review the proposed valuations for investments and financial instruments and is responsible for evaluating the overall fairness and consistent application of established policies.

As of December 31, 2020, the Company's investments consisted of senior loans, asset-backed securities, corporate bonds and notes, collateralized loan obligations, convertible bonds foreign bonds and notes, sovereign bonds, common stocks, preferred stocks, warrants, LLC Interests and securities sold short. The fair value of the Company's loans, bonds and asset-backed securities are generally based on quotes received from brokers or independent pricing services. Loans, bonds, and asset-backed securities with quotes that are based on actual trades with a sufficient level of activity on or near the measurement date are classified as

NOTES TO FINANCIAL STATEMENTS (continued)

December 31, 2020

NexPoint Strategic Opportunities Fund

Level 2 assets. Senior loans, bonds and asset-backed securities that are priced using quotes derived from implied values, indicative bids, or a limited number of actual trades are classified as Level 3 assets because the inputs used by the brokers and pricing services to derive the values are not readily observable.

The fair value of the Company's common stocks, preferred stocks, exchange-traded funds, other registered investment companies and warrants that are not actively traded on national exchanges are generally priced using quotes derived from implied values, indicative bids, or a limited amount of actual trades and are classified as Level 3 assets because the inputs used by the brokers and pricing services to derive the values are not readily observable. The Company's real estate investments include equity interests in limited liability companies and equity issued by REITs that invest in commercial real estate. The fair value of real estate investments that are not actively traded on national exchanges are based on internal models developed by the Investment Adviser. The significant inputs to the models include cash flow projections for the underlying properties, capitalization rates and appraisals performed by independent valuation firms. These inputs are not readily observable, and the Company has classified the investments as Level 3 assets. Exchange-traded options are valued based on the last trade price on the primary exchange on which they trade. If an

option does not trade, the mid-price, which is the mean of the bid and ask price, is utilized to value the option.

At the end of each calendar quarter, the Investment Adviser evaluates the Level 2 and 3 assets and liabilities for changes in liquidity, including but not limited to: whether a broker is willing to execute at the quoted price, the depth and consistency of prices from third party services, and the existence of contemporaneous, observable trades in the market. Additionally, the Investment Adviser evaluates the Level 1 and 2 assets and liabilities on a quarterly basis for changes in listings or delistings on national exchanges.

Reverse repurchase agreements are priced at their acquisition cost, and assessed for credit adjustments, which represent fair value. These investments will generally be categorized as Level 2 liabilities.

Due to the inherent uncertainty of determining the fair value of investments that do not have a readily available market value, the fair value of the Company's investments may fluctuate from period to period. Additionally, the fair value of investments may differ significantly from the values that would have been used had a ready market existed for such investments and may differ materially from the values the Company may ultimately realize. Further, such investments may be subject to legal and other restrictions on resale or otherwise be less liquid than publicly traded securities.

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. A summary of the inputs used to value the Company's assets and liabilities as of December 31, 2020 is as follows:

	Total value at December 31, 2020	Level 1 Quoted Price	Level 2 Significant Observable Inputs	Level 3 Significant Unobservable Inputs

⁽¹⁾ This category includes securities with a value of zero.

Investments designated as Level 3 may include assets or liabilities valued using quotes or indications furnished by brokers which are based on models or estimates without observable inputs and may not be executable prices. In light of the developing market conditions, the Investment Adviser continues to search for observable data points and evaluate broker quotes and indications received for portfolio investments.

For the year ended December 31, 2020, there were transfers in to Level 3. These transfers are primarily due to increased investments in level 3 real estate related positions. Determination of fair value is uncertain because it involves subjective judgments and estimates that are unobservable.

The following is a summary of significant unobservable inputs used in the fair valuation of assets and liabilities categorized within Level 3 of the fair value hierarchy:

Category	Market Value at December 31, 2020	Valuation Technique	Unobservable Inputs	Input Value(s)
Common Stock	\$353,752,818	Multiples Analysis	Unadjusted Price/MHz-PoP	\$0.09 - \$0.95
			Discounted Cash Flow	Discount Rate
		Transaction Indication of Value	Enterprise Value (\$mm)	\$771.0
			Subscription Price Per Share	\$16.61
		Direct Capitalization Method	Tender Offer	\$1.10
			Capitalization Rates	5.73% - 9.5%
Preferred Stock	66,453,865	Discounted Cash Flow	Net Asset Value	\$36.56
			Discount Rate	11.0%
		Third Party Indication of Value	Broker Quote	Various
LLC Interest	153,742,923	Discounted Cash Flow	Discount Rate	1.28% - 5.93%
			Net Asset Value	Net Asset Value
		Transaction Indication of Value	Cost Price Per Share	\$1,063.47
			Discounted Cash Flow	Discount Rate
U.S. Senior Loans	74,431,268	Discounted Cash Flow	Discount Rate	11.0% - 15.0%
			Discounted Cash Flow	Discount Rate
Collateralized Loan Obligation	4,623,353	Third Party Indication of Value	Broker Quote	Various
Total	\$653,004,227			

December 31, 2020

NexPoint Strategic Opportunities Fund

In addition to the unobservable inputs utilized for various valuation methodologies, the Company frequently uses a combination of two or more valuation methodologies to determine fair value for a single holding. In such instances, the Company assesses the methodologies and ascribes weightings to each methodology. The weightings ascribed to any individual methodology ranged from as low as 5% to as high as 95% as of December 31, 2020. The selection of weightings is an inherently subjective process, dependent on professional judgement. These selections may have a material impact to the concluded fair value for such holdings.

The significant unobservable input used in the fair value measurement of the Company's collateralized loan obligations is the discount rate and broker quote. Significant decreases (increases) in any of those inputs in isolation could result in a significantly higher (lower) fair value measurement.

The significant unobservable input used in the fair value measurement of the Company's preferred stock, U.S. Senior Loans, and LLC interests is the discount rate. Significant decreases (increases) in any of those inputs in isolation could result in a significantly higher (lower) fair value measurement.

The significant unobservable inputs used in the fair value measurement of the Company's common stock are the price/MHz-PoP multiple, discount rate, enterprise value, subscription price, tender offer, and capitalization rates. Significant increases (decreases) in any of those inputs in isolation could result in a significantly lower (higher) fair value measurement. Generally, a change in the assumption used for the risk discount is accompanied by a directionally opposite change in the assumption for the price/MHz-PoP multiple.

Security Transactions

Security transactions are accounted for on the trade date. Realized gains/(losses) on investments sold are recorded on the basis of the specific identification method for both financial statement and U.S. federal income tax purposes taking into account any foreign taxes withheld.

Income Recognition

Corporate actions (including cash dividends) are recorded on the ex-dividend date, net of applicable withholding taxes, except for certain foreign corporate actions, which are recorded as soon after ex-dividend date as such information becomes available and is verified. Interest income and PIK are recorded on the accrual basis.

Accretion of discount on taxable bonds and loans are computed to the maturity date, while amortization of premium on taxable bonds and loans is computed on the earliest call date, both using the effective yield method. Withholding

taxes on foreign dividends have been provided for in accordance with the Company's understanding of the applicable country's tax rules and rates.

U.S. Federal Income Tax Status

The Company is treated as a separate taxpayer for U.S. federal income tax purposes. The Company intends to qualify each year as a "regulated investment company" under Subchapter M of the Internal Revenue Code of 1986, (the "Code") as amended, and will distribute substantially all of its taxable income and gains, if any, for the tax year, and as such will not be subject to U.S. federal income taxes. In addition, the Company intends to distribute, in each calendar year, all of its net investment income, capital gains and certain other amounts, if any, such that the Company should not be subject to U.S. federal excise tax. Therefore, no U.S. federal income or excise tax provisions are recorded. The Company recognizes interest and penalties, if any, related to unrecognized tax benefits as income tax expense in Statement of Operations. During the year ended December 31, 2020, there were none.

The Investment Adviser has analyzed the Company's tax positions taken on U.S. federal income tax returns for all open tax years (current and prior three tax years), and has concluded that no provision for U.S. federal income tax is required in the Company's financial statements. The Company's U.S. federal and state income and U.S. federal excise tax returns for tax years for which the applicable statutes of limitations have not expired are subject to examination by the Internal Revenue Service and state departments of revenue. Furthermore, the Investment Adviser of the Company is also not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will significantly change in the next 12 months.

Distributions to Shareholders

The Company plans to pay distributions from net investment income monthly and net realized capital gains annually to common shareholders. To permit the Company to maintain more stable monthly distributions and annual distributions, the Company may from time to time distribute less than the entire amount of income and gains earned in the relevant month or year, respectively. The undistributed income and gains would be available to supplement future distributions. In certain years, this practice may result in the Company distributing, during a particular taxable year, amounts in excess of the amount of income and gains earned therein. Such distributions would result in a portion of each distribution occurring in that year to be treated as a return of capital to shareholders. Shareholders of the Company will automatically have all distributions reinvested in Common Shares of the Company issued by the Company in accordance with the Company's Dividend Reinvestment Plan (the

December 31, 2020

NexPoint Strategic Opportunities Fund

“Plan”) unless an election is made to receive cash. The number of newly issued Common Shares to be credited to each participant’s account will be determined by dividing the dollar amount of the dividend by the lesser of (i) the NAV per Common Share determined on the Declaration Date and (ii) the market price per Common Share as of the close of regular trading on the NYSE on the Declaration Date. Participants in the Plan requesting a sale of securities through the plan agent of the Plan are subject to a sales fee and a brokerage commission.

Statement of Cash Flows

Information on financial transactions which have been settled through the receipt or disbursement of cash is presented in the Statement of Cash Flows. The cash amount shown in the Statement of Cash Flows is the amount included within the Company’s Statement of Assets and Liabilities and includes cash on hand at its custodian bank and/or sub-custodian bank(s) and investments in money market funds deemed to be cash equivalents, and restricted cash posted as collateral in a segregated account or with broker-dealers.

Cash & Cash Equivalents

The Company considers liquid assets deposited with a bank and certain short-term debt instruments of sufficient credit quality with original maturities of three months or less to be cash equivalents. The Company also considers money market instruments that invest in cash equivalents to be cash equivalents. These investments represent amounts held with financial institutions that are readily accessible to pay Company expenses or purchase investments. Cash and cash equivalents are valued at cost plus accrued interest, which approximates fair value. The value of cash equivalents denominated in foreign currencies is determined by converting to U.S. dollars on the date of this financial report. These balances may exceed the federally insured limits under the Federal Deposit Insurance Corporation (“FDIC”).

Foreign Currency

Accounting records of the Company are maintained in U.S. dollars. Foreign currencies, investments and other assets and liabilities denominated in foreign currencies are translated into U.S. dollars at exchange rates using the current 4:00 PM London Time Spot Rate. Fluctuations in the value of the foreign currencies and other assets and liabilities resulting from changes in exchange rates, between trade and settlement dates on securities transactions and between the accrual and payment dates on dividends, interest income and foreign withholding taxes, are recorded as unrealized foreign currency gains/(losses). Realized gains/(losses) and unrealized appreciation/(depreciation) on investment securities and income and expenses are translated on the

respective dates of such transactions. The effects of changes in foreign currency exchange rates on investments in securities are not segregated in the Statement of Operations from the effects of changes in market prices of those securities, but are included with the net realized and unrealized gain or loss on investment securities.

Securities Sold Short

The Company may sell securities short. A security sold short is a transaction in which the Company sells a security it does not own in anticipation that the market price of that security will decline. When the Company sells a security short, it must borrow the security sold short from a broker-dealer and deliver it to the buyer upon conclusion of the transaction. A Company may have to pay a fee to borrow particular securities and is often obligated to pay over any dividends or other payments received on such borrowed securities. In some circumstances, a Company may be allowed by its prime broker to utilize proceeds from securities sold short to purchase additional investments, resulting in leverage. Securities and cash held as collateral for securities sold short are shown on the Investment Portfolio for the Company. Cash held as collateral for securities sold short is classified as restricted cash on the Statement of Assets and Liabilities, as applicable. Restricted cash in the amount of \$1,856,726 was held with the broker for the Company.

When securities are sold short, the Company intends to limit exposure to a possible market decline in the value of its portfolio securities through short sales of securities that the Investment Adviser believes possess volatility characteristics similar to those being hedged. In addition, the Company may use short sales for non-hedging purposes to pursue its investment objective. Subject to the requirements of the 1940 Act and the Internal Revenue Code of 1986, as amended (the “Code”), the Company will not make a short sale if, after giving effect to such sale, the market value of all securities sold short by the Company exceeds 25% of the value of its total assets. The Company may make short sales “against the box” without respect to such limitations.

Other Fee Income

Fee income may consist of origination/closing fees, amendment fees, administrative agent fees, transaction break-up fees and other miscellaneous fees. Origination fees, amendment fees, and other similar fees are non-recurring fee sources. Such fees are received on a transaction by transaction basis and do not constitute a regular stream of income and are recognized when incurred.

Note 3. Derivative Transactions

The Company is subject to interest rate risk in the normal course of pursuing its investment objectives. The Company

NOTES TO FINANCIAL STATEMENTS (continued)

December 31, 2020

NexPoint Strategic Opportunities Fund

enters into derivative transactions for the purpose of hedging against the effects of changes in the value of portfolio securities due to anticipated changes in market conditions, to gain market exposure for residual and accumulating cash positions and for managing the duration of fixed income investments.

Options

The Company may utilize options on securities or indices to varying degrees as part of their principal investment strategy. An option on a security is a contract that gives the holder of the option, in return for a premium, the right to buy from (in the case of a call) or sell to (in the case of a put) the writer of the option the security underlying the option at a specified exercise or "strike" price. The writer of an option on a security has the obligation upon exercise of the option to deliver the underlying security upon payment of the exercise price or to pay the exercise price upon delivery of the underlying security. The Company may hold options, write option contracts, or both.

If an option written by the Company expires unexercised, the Company realizes on the expiration date a capital gain equal to the premium received by the Company at the time the option was written. If an option purchased by the Company expires unexercised, the Company realizes a capital loss equal to the premium paid. Prior to the earlier of exercise or expiration, an exchange-traded option may be closed out by an offsetting purchase or sale of an option of the same series (type, underlying security, exercise price and expiration). There can be no assurance, however, that a closing purchase or sale transaction can be affected when the Company desires. The Company will realize a capital gain from a closing purchase transaction if the cost of the closing option is less than the premium received from writing the option, or, if the cost of the closing option is more than the premium received from writing the option, a capital loss. The Company will realize a capital gain from a closing sale transaction if the premium received from the sale is more than the original premium paid when the option position was opened, or a capital loss, if the premium received from a sale is less than the original premium paid.

Reverse Repurchase Agreements

The Company may engage in reverse repurchase agreement transactions with respect to instruments that are consistent with the Company's investment objective or policies. The Company did not hold any reverse repurchase agreements at December 31, 2020.

Additional Derivative Information

The Company is required to disclose; a) how and why an entity uses derivative instruments; b) how derivative instruments and related hedged items are accounted for; c) how

derivative instruments and related hedged items affect an entity's financial position, financial performance and cash flows; and d) how the netting of derivatives subject to master netting arrangements (if applicable) affects the net exposure of the Company related to the derivatives.

The fair value of derivative instruments on the Statement of Assets and Liabilities have the following risk exposure at December 31, 2020:

Risk Exposure	Fair Value	
	Asset Derivative	Liability Derivative
Foreign Exchange Risk	\$—	\$—

The effect of derivative instruments on the Statement of Operations for the year ended December 31, 2020, is as follows:

Risk Exposure	Net Realized Gain (Loss) on Derivatives	Net Change in Unrealized Appreciation/ (Depreciation) on Derivatives
Equity Price Risk	\$24,712,120 ⁽¹⁾⁽²⁾⁽³⁾	\$1,102,319 ⁽¹⁾
Foreign Currency Risk	(2,882,250) ⁽¹⁾	1,847,650 ⁽⁴⁾

(1) Statement of Operations location: Realized gain (loss) on future contracts.

(2) Statement of Operations location: Realized gain (loss) on investments from unaffiliated issuers.

(3) Statement of Operations location: Realized gain (loss) on written options contracts.

(4) Statement of Operations location: Net change in unrealized appreciation/(depreciation) on investments from unaffiliated issuers.

The average monthly volume of derivative activity for the year ended December 31, 2020, is as follows:

	Units/ Contracts	Appreciation/ (Depreciation)
Purchased Options Contracts	227,083,969	\$ —
Written Options Contracts	313	—
Futures Contracts ⁽¹⁾	—	497,697

(1) Futures Contracts average monthly volume is calculated using Appreciation/(Depreciation).

Note 4. Securities Lending

Effective January, 7, 2020, the Investment Adviser entered into a securities lending agreement with The Bank of New York Mellon ("BNY" or the "Lending Agent"). Securities lending transactions are entered into by the Company under the Securities Lending Agreement, ("SLA") which permits the Company, under certain circumstances such as an event of default, to offset amounts payable by the Company to the same counterparty against amounts receivable from the counterparty to create a net payment due to or from the Company.

NOTES TO FINANCIAL STATEMENTS (continued)

December 31, 2020

NexPoint Strategic Opportunities Fund

The Company seeks additional income by making secured loans of its portfolio securities through its custodian. Such loans are not greater than one-third of the value of the Company's total assets. BNY would charge a Company fees based on a percentage of the securities lending income.

The market value of the loaned securities is determined at the close of each business day of the Company and any additional required collateral is delivered to the Company, or excess collateral is returned by the Company, on the next business day.

The Company receives collateral consisting of cash (U.S. and foreign currency), securities issued or guaranteed by the U.S. government or its agencies or instrumentalities, sovereign debt, convertible bonds, irrevocable bank letters of credit or such other collateral as may be agreed on by the parties to a securities lending arrangement, initially with a value of 102% or 105% of the market value of the loaned securities and thereafter maintained at a value of 100% of the market value of the loaned securities. If the collateral consists of non-cash collateral, the borrower would pay the Company a loan premium fee. If the collateral consists of cash, BNY reinvests the cash. Although voting rights, or rights to consent, with respect to the loaned securities pass to the borrower, the Company would recall the loaned securities upon reasonable notice in order that the securities could be voted by the Company if the holders of such securities are asked to vote upon or consent to matters materially affecting the investment. The Company also could call such loans in order to sell the securities involved.

Securities lending transactions were entered into pursuant to SLA, which would provide the right, in the event of default (including bankruptcy or insolvency) for the non-defaulting party to liquidate the collateral and calculate a net exposure to the defaulting party or request additional collateral. In the event that a borrower defaulted, the Company, as lender, would offset the market value of the collateral received against the market value of the securities loaned. The value of the collateral is typically greater than that of the market value of the securities loaned, leaving the lender with a net amount payable to the defaulting party. However, bankruptcy or insolvency laws of a particular jurisdiction may impose restrictions on or prohibitions against such a right of offset in the event of an SLA counterparty's bankruptcy or insolvency. Under the SLA, the Company can reinvest cash collateral, or, upon an event of default, resell or repledge the collateral, and the borrower can resell or repledge the loaned securities. The risks of securities lending also include the risk that the borrower may not provide additional collateral when required or may not return the securities when due. To mitigate this risk, each Company benefits from a

borrower default indemnity provided by BNY. BNY's indemnity generally provides for replacement of securities lent or the approximate value thereof.

Note 5. U.S. Federal Income Tax Information

The character of income and gains to be distributed is determined in accordance with income tax regulations which may differ from GAAP. These differences include (but are not limited to) investments organized as partnerships for tax purposes, foreign taxes, investments in futures, losses deferred to off-setting positions, tax treatment of organizational start-up costs, losses deferred due to wash sale transactions. Reclassifications are made to the Company's capital accounts to reflect income and gains available for distribution (or available capital loss carryovers) under income tax regulations. These reclassifications have no impact on the NAV of the Company.

For the year ended December 31, 2020, permanent differences chiefly resulting from foreign currency gains and losses, defaulted bonds, partnership basis adjustments, return of capital distributions from real estate investment trusts, passive foreign investment companies and paydowns and controlled foreign corporations were identified and reclassified among the components of the Company's net assets as follows:

Total Distributable Earnings (Loss)	Paid-in-Capital
\$(1,079,673)	\$1,079,673

For the year ended December 31, 2020, the Company's most recent tax year end, components of distributable earnings on a tax basis are as follows:

Undistributed Net Investment Income	Accumulated Capital and Other Losses	Net Tax Appreciation/ (Depreciation)
\$	\$(107,505,838)	\$(284,103,210)

For the year ended December 31, 2020, the Company had capital loss carryovers as indicated below. The capital loss carryovers are available to offset future realized capital gains to the extent provided in the Code and regulations promulgated thereunder. To the extent that these carryover losses are used to offset future capital gains, it is probable that the gains so offset will not be distributed to shareholders because they would be taxable as ordinary income.

No Expiration Short-Term	No Expiration Long-Term	Total
\$—	\$107,505,838	\$107,505,838

NOTES TO FINANCIAL STATEMENTS (continued)

December 31, 2020

NexPoint Strategic Opportunities Fund

The tax character of distributions paid during the years ended December 31, 2020 and December 31, 2019 (unless otherwise indicated) is as follows:

Distributions Paid From:	2020	2019
Ordinary Income ⁽¹⁾	\$14,413,750	\$15,470,784
Return of Capital	42,706,352	81,221,226

⁽¹⁾ For tax purposes, short-term capital gains distributions, if any, are considered ordinary income distributions.

Unrealized appreciation (depreciation) at December 31, 2020, based on cost of investments, short sales and foreign currency transactions for U.S. federal income tax purposes is:

Gross Appreciation	Gross Depreciation	Net Appreciation/ (Depreciation) ⁽¹⁾	Cost
\$55,140,100	\$(339,243,310)	\$(284,103,210)	\$1,128,396,722

⁽¹⁾ Any differences between book-basis and tax-basis net unrealized appreciation/(depreciation) are primarily due to wash sales, non-taxable dividends, partnership, Controlled Foreign Corporation and Passive Foreign Investment Company (Qualifying Electing Company) basis adjustments and defaulted bonds.

Qualified Late Year Ordinary and Post October Losses

Under current laws, certain capital losses and specified losses realized after October 31 may be deferred and treated as occurring on the first day of the following fiscal year. For the fiscal year ended December 31, 2020, the Company did not elect to defer net realized losses incurred from November 1, 2020 through December 31, 2020.

Note 6. Credit Agreements and Reverse Repurchase Agreement

Committed Facility Agreement with BNPP PB, Inc.

On May 16, 2013, the Company entered into a Committed Facility Agreement with BNP Paribas Prime Brokerage, Inc. ("BNPP PB, Inc.") (the "Committed Facility Agreement"). The current facility size of the Committed Facility Agreement is \$135,000,000 and the Company is required to pay 0.55% on the uncommitted balance and LIBOR + a spread on amounts borrowed. The spread ranges from 0.60% to 1.30% depending on the quality of the holdings pledged to collateralize the loan. As of May 15, 2020, this Committed Facility Agreement was terminated with BNPP PB, Inc.

The Company's average daily balance was \$31,966,689 at a weighted average interest rate of 2.44% for the days outstanding, excluding any commitment fee. The maximum borrowed amount during the year was \$103,037,786. With respect to the note balance, interest expense of \$285,011 and uncommitted balance fee of \$214,089 are included in interest expense and commitment fees in the Statement of Operations.

Repurchase Agreement with BNP Securities

On November 16, 2017, the Company entered into an agreement with BNP Paribas Securities Corporation ("BNP Securities") under which it may from time to time enter into reverse repurchase transactions pursuant to the terms of a master repurchase agreement and related annexes (collectively the "Repurchase Agreement"). A reverse repurchase transaction is a repurchase transaction in which the Company is the seller of securities or other assets and agrees to repurchase them at a date certain or on demand. Pursuant to the Repurchase Agreement, the Company may agree to sell securities or other assets to BNP Securities for an agreed-upon price (the "Purchase Price"), with a simultaneous agreement to repurchase such securities or other assets from BNP Securities for the Purchase Price plus a price differential that is economically similar to interest. The price differential is negotiated for each transaction. As of May 15, 2020, this Repurchase Agreement was terminated with BNP securities. The Company's average daily balance was \$15,913,376 at a weighted average interest rate of 2.68% for the days outstanding.

Repurchase Agreement with Mizuho Securities

On September 25, 2018, the Company entered into an agreement with Mizuho Securities USA LLC ("Mizuho Securities") under which it may from time to time enter into reverse repurchase transactions pursuant to the terms of a master repurchase agreement and related annexes (collectively the "Repurchase Agreement"). A reverse repurchase transaction is a repurchase transaction in which the Company is the seller of securities or other assets and agrees to repurchase them at a date certain or on demand. Pursuant to the Repurchase Agreement, the Company may agree to sell securities or other assets to Mizuho Securities for an agreed upon price (the "Purchase Price"), with a simultaneous agreement to repurchase such securities or other assets from Mizuho Securities for the Purchase Price plus a price differential that is economically similar to interest. The price differential is negotiated for each transaction. This creates leverage for the Company because the cash received can be used to purchase other securities. At December 31, 2020, the Company's outstanding balance on the Mizuho Securities was \$0. The Company's average daily balance was \$82,171,213 at a weighted average interest rate of 3.15% for the days outstanding.

Revolving Credit Agreement with KeyBank

On August 14, 2018, the Company, together with its wholly owned REIT subsidiaries, entered into an amended and restated revolving credit agreement (the "Revolving Credit Agreement") with KeyBank, National Association ("KeyBank") whereby KeyBank agreed to loan the Company up to \$75,000,000 until September 13, 2018, and

NOTES TO FINANCIAL STATEMENTS (continued)

December 31, 2020

NexPoint Strategic Opportunities Fund

\$60,000,000 after September 14, 2018, with interest paid at a rate of LIBOR + 2.00%. The Company paid a commitment fee of \$375,000 to KeyBank as a condition to closing.

On September 24, 2019, the Company amended the Revolving Credit Agreement to temporarily increase the aggregate Commitments to \$97,500,000 until October 24, 2019, when the aggregate Commitments were reduced to \$60,000,000. The Company paid an amendment fee in the amount of \$37,500 as a condition to closing.

On November 26, 2019, the Company amended the Revolving Credit Agreement to temporarily increase the aggregate Commitments to \$100,000,000 until December 26, 2019, when the aggregate Commitments were reduced to \$60,000,000. The Company paid an amendment fee in the amount of \$40,000 as a condition to closing.

On December 26, 2019, the Company amended the Revolving Credit Agreement to extend the term of the prior temporary increase to January 15, 2020.

On February 7, 2020, the Company amended the Revolving Credit Agreement to reduce the aggregate Commitments to \$45,000,000.

On September 17, 2020, the Company entered into a waiver and amendment to the Revolving Credit Agreement pursuant to which the Company agreed to an amortization schedule to reduce the aggregate Commitments, the maturity date was extended to August 14, 2021, and KeyBank agreed to waive an Existing Default (as defined in the Revolving Credit Agreement). The Company paid an extension and amendment fee in the amount of \$112,500 as a condition to closing.

On October 30, 2020, the Company's custodian failed to process interest payments owed to the Company on certain investments which resulted in the Company's failure to make a payment to KeyBank in the amount of \$3,000,000, which, pursuant to the terms of the Bridge Agreement, resulted in an event of default on November 4, 2020. On November 13, 2020, KeyBank provided a written waiver of the event of default and the Company repaid the outstanding amount due of \$3,000,000.

On November 13, 2020, the Company entered into a waiver to the Revolving Credit Agreement pursuant to which KeyBank agreed to waive an Existing Default (as defined in the Revolving Credit Agreement).

The maturity date of the Revolving Credit Agreement is August 14, 2021, subject to extensions, and interest is paid at a rate of LIBOR + 2.00%.

As of December 31, 2020, the carrying value of the Revolving Credit Agreement was \$45,000,000. The fair value of the outstanding Revolving Credit Agreement is estimated to be

\$45,019,620 and would be categorized as Level 3 within the fair value hierarchy. The fair value was estimated based on discounting the cash flows owed using a discount rate of 0.50% over the 90-day risk free rate.

For the year ended December 31, 2020, the average daily note balance was \$53,191,803 at a weighted average interest rate of 2.64%, excluding any commitment fee. The maximum borrowed amount during the year was \$77,400,000. With respect to the note balance, interest expense of \$1,414,901 and uncommitted balance fee of \$0 are included in interest expense and commitment fees in the Statement of Operations.

Note 7. Asset Coverage

The Company is required to maintain 300% asset coverage with respect to amounts outstanding (excluding short-term borrowings) under its various leverage facilities. Asset coverage is calculated by subtracting the Company's total liabilities, not including any amount representing bank borrowings and senior securities, from the Company's total assets and dividing the result by the principal amount of the borrowings outstanding. As of the dates indicated below, the Company's debt outstanding and asset coverage was as follows:

Date	Total Amount Outstanding	% of Asset Coverage of Indebtedness
12/31/2020	\$ 45,000,000	1,858.3%
12/31/2019	332,977,746 ⁽³⁾	392.4 ⁽³⁾
12/31/2018	244,107,979 ⁽³⁾	414.5 ⁽³⁾
12/31/2017	31,933,494	1,954.8
12/31/2016	124,983,081	431.9
12/31/2015	186,625,315 ⁽¹⁾	296.2 ⁽¹⁾⁽²⁾
12/31/2014	385,336,455	323.0
12/31/2013	318,500,000	327.5
12/31/2012	225,000,000	311.7
12/31/2011	173,000,000	356.1

⁽¹⁾ Excludes borrowings of \$29,300,000 deemed to be short-term in nature.

⁽²⁾ The Company closes its net asset value daily, and using asset prices available at the time of the December 31, 2015 NAV close, the Company calculated asset coverage of greater than 300%. The Company received updated prices for certain instruments in January that were used for financial reporting purposes as part of this report. These updated prices pushed the percentage of asset coverage down to 296.2%. As of February 4, 2016, the date that the Company declared the February monthly dividend, the percentage of asset coverage was over 300%.

⁽³⁾ The KeyBank Bridge Agreement referenced in Note 6 is shared with two subsidiaries, of which the Company acts as a guarantor for the agreement. As such, an additional \$4.6mm of the subsidiaries borrowings on the KeyBank Bridge Agreement is reflected in the asset coverage table for a comprehensive view of the Asset Coverage of Indebtedness percentage.

December 31, 2020

NexPoint Strategic Opportunities Fund

Note 8. Investment Advisory, Administration and Trustee Fees

Investment Advisory Fee

The Investment Adviser to the Company receives an annual fee, paid monthly, in an amount equal to 1.00% of the average weekly value of the Company's Managed Assets. The Company's "Managed Assets" is an amount equal to the total assets of the Company, including any form of leverage, minus all accrued expenses incurred in the normal course of operations, but not excluding any liabilities or obligations attributable to investment leverage obtained through (i) indebtedness of any type (including, without limitation, borrowing through a credit facility or the issuance of debt securities), (ii) the issuance of preferred stock or other preference securities, (iii) the reinvestment of collateral received for securities loaned in accordance with the Company's investment objectives and policies, and/or (iv) any other means.

Administration Fee

The Investment Adviser provides administrative services to the Company. For its services, the Investment Adviser receives an annual fee, payable monthly, in an amount equal to 0.20% of the average weekly value of the Company's Managed Assets. Under a separate sub-administration agreement, the Investment Adviser has delegated certain administrative functions to SEI Global Funds Services ("SEI"). The Investment Adviser pays SEI directly for these sub-administration services.

Fees Paid to Officers and Trustees

Each Trustee (other than Mr. Constantino) received an annual retainer of \$150,000 payable in quarterly installments and allocated among each portfolio in the Fund Complex overseen by such Trustee based on relative net assets. The annual fee for Mr. Constantino is prorated based on the Company's allocable portion of the annual retainer. The "Fund Complex" consists of all of the registered investment companies advised by the Investment Adviser or its affiliated advisers and NexPoint Capital, Inc., a closed-end management investment company that has elected to be treated as a business development company under the 1940 Act as of the date of this report.

The Company pays no compensation to its officers, all of whom are employees of the Investment Adviser or one of its affiliates.

Trustees are reimbursed for actual out-of-pocket expenses relating to attendance at meetings, however, the Chairman of the Board and the Chairman of the Audit and Qualified Legal Compliance Committee each receive an additional

payment of \$10,000 payable in quarterly installments and allocated among each portfolio in the Fund Complex based on relative net assets.

The Trustees do not receive any separate compensation in connection with service on Committees or for attending Board or Committee Meetings. The Trustees do not have any pension or retirement plan.

Indemnification

Under the Company's organizational documents, the officers and Trustees have been granted certain indemnification rights against certain liabilities that may arise out of performance of their duties to the Company. Additionally, in the normal course of business, the Company may enter into contracts with service providers that contain a variety of indemnification clauses. The Company's maximum exposure under these arrangements is dependent on future claims that may be made against the Company and, therefore, cannot be estimated.

Note 9. Disclosure of Significant Risks and Contingencies

The Company's investments expose the Company to various risks, certain of which are discussed below. Please refer to the Company's prospectus and statement of additional information for a full listing of risks associated with the Company's investments.

Counterparty Risk

Counterparty risk is the potential loss the Company may incur as a result of the failure of a counterparty or an issuer to make payments according to the terms of a contract. Counterparty risk is measured as the loss the Company would record if its counterparties failed to perform pursuant to the terms of their obligations to the Company. Because the Company may enter into over-the-counter forwards, options, swaps and other derivative financial instruments, the Company may be exposed to the credit risk of their counterparties. To limit the counterparty risk associated with such transactions, the Company conducts business only with financial institutions judged by the Investment Adviser to present acceptable credit risk.

Covenant-Lite Loans Risk

Loans in which the Company invests include covenant-lite loans, which carry more risk to the lender than traditional loans as they may contain fewer or less restrictive covenants on the borrower than traditionally included in loan documentation or may contain other borrower friendly characteristics. The Company may experience relatively greater difficulty or delays in enforcing its rights on its holdings of certain covenant-lite loans and debt securities than its holdings of loans or securities with the usual covenants.

December 31, 2020

NexPoint Strategic Opportunities Fund

Emerging Markets Risk

Any investments in Emerging Market Countries (countries in which the capital markets are developing) may involve greater risks than investments in more developed markets and the prices of such investments may be more volatile. The consequences of political, social or economic changes in these markets may have disruptive effects on the market prices of the Company's investments and the income they generate, as well as the Company's ability to repatriate such amounts.

Equity Securities Risk

The risk that stock prices will fall over short or long periods of time. In addition, common stocks represent a share of ownership in a company, and rank after bonds and preferred stock in their claim on the company's assets in the event of bankruptcy.

Illiquid and Restricted Securities Risk

Certain investments made by the Company may be illiquid, and consequently the Company may not be able to sell such investments at prices that reflect the Investment Adviser's assessment of their value or the amount originally paid for such investments by the Company. Illiquidity may result from the absence of an established market for the investments as well as legal, contractual or other restrictions on their resale and other factors. Furthermore, the nature of the Company's investments, especially those in financially distressed companies, may require a long holding period prior to profitability. Restricted securities (i.e., securities acquired in private placement transactions) and illiquid securities may offer higher yields than comparable publicly traded securities. The Company, however, may not be able to sell these securities when the Investment Adviser considers it desirable to do so or, to the extent they are sold privately, may have to sell them at less than the price of otherwise comparable securities. Restricted securities are subject to limitations on resale which can have an adverse effect on the price obtainable for such securities. Also, if in order to permit resale the securities are registered under the Securities Act at a Company's expense, the Company's expenses would be increased. A high percentage of illiquid securities in a Company creates a risk that such a Company may not be able to redeem its shares without causing significant dilution to remaining shareholders.

Interest Rate Risk

The risk that fixed income securities will decline in value because of changes in interest rates. When interest rates decline, the value of fixed rate securities already held by the Company can be expected to rise. Conversely, when interest rates rise, the value of existing fixed rate portfolio securities can be expected to decline. A Company with a longer

average portfolio duration will be more sensitive to changes in interest rates than a Company with a shorter average portfolio duration.

On July 27, 2017, the head of the United Kingdom's Financial Conduct Authority announced a desire to phase out the use of the London Interbank Offered Rate ("LIBOR") by the end of 2021. Please refer to "LIBOR Transition and Associated Risk" for more information.

Leverage Risk

The Company may use leverage in its investment program, including the use of borrowed funds and investments in certain types of options, such as puts, calls and warrants, which may be purchased for a fraction of the price of the underlying securities. While such strategies and techniques increase the opportunity to achieve higher returns on the amounts invested, they also increase the risk of loss. To the extent the Company purchases securities with borrowed funds, its net assets will tend to increase or decrease at a greater rate than if borrowed funds are not used. If the interest expense on borrowings were to exceed the net return on the portfolio securities purchased with borrowed funds, the Company's use of leverage would result in a lower rate of return than if the Company were not leveraged.

LIBOR Transition and Associated Risk

Certain instruments held by the Company pay an interest rate based on the London Interbank Offered Rate ("LIBOR"), which is the average offered rate for various maturities of short-term loans between certain major international banks. LIBOR is expected to be phased out by the end of 2021. While the effect of the phase out cannot yet be determined, it may result in, among other things, increased volatility or illiquidity in markets for instruments based on LIBOR and changes in the value of such instruments.

Pandemics and Associated Economic Disruption

An outbreak of respiratory disease caused by a novel coronavirus was first detected in China in December 2019 and subsequently spread internationally. This coronavirus has resulted in the closing of borders, enhanced health screenings, healthcare service preparation and delivery, quarantines, cancellations, disruptions to supply chains and customer activity, as well as general anxiety and economic uncertainty. The impact of this coronavirus may be short term or may last for an extended period of time and result in a substantial economic downturn. Health crises caused by outbreaks of disease, such as the coronavirus, may exacerbate other pre-existing political, social and economic risks. This outbreak, and other epidemics and pandemics that may arise in the future, could negatively affect the global economy, as well as the economies of individual

December 31, 2020

NexPoint Strategic Opportunities Fund

countries, individual companies and the market in general in significant and unforeseen ways. For example, a widespread health crisis such as a global pandemic could cause substantial market volatility, exchange trading suspensions and closures, impact the Company's ability to complete repurchase requests, and affect Company performance. Any such impact could adversely affect the Company's performance, the performance of the securities in which the Company invests, lines of credit available to the Company and may lead to losses on your investment in the Company. In addition, the increasing interconnectedness of markets around the world may result in many markets being affected by events or conditions in a single country or region or events affecting a single or small number of issuers.

Preferred Share Risk

The risk associated with the issuance of preferred shares to leverage the common shares. When preferred shares are issued, the NAV and market value of the common shares become more volatile, and the yield to the holders of common shares will tend to fluctuate with changes in the shorter-term dividend rates on the preferred shares. The Company will pay (and the holders of common shares will bear) all costs and expenses relating to the issuance and ongoing maintenance of the preferred shares, including higher advisory fees. Accordingly, the issuance of preferred shares may not result in a higher yield or return to the holders of the common shares. If the dividend rate and other costs of the preferred shares approach the net rate of return on the Company's investment portfolio, the benefit of leverage to the holders of the common shares would be reduced. If the dividend rate and other costs of the preferred shares exceed the net rate of return on the Company's investment portfolio, the leverage will result in a lower rate of return to the holders of common shares than if the Company had not issued preferred shares.

Preferred Stock Risk

Preferred stock, which may include preferred stock in real estate transactions, represents an equity or ownership interest in an issuer that pays dividends at a specified rate and that has precedence over common stock in the payment of dividends. In the event an issuer is liquidated or declares bankruptcy, the claims of creditors and owners of bonds take precedence over the claims of those who own preferred and common stock. If interest rates rise, the fixed dividend on preferred stocks may be less attractive, causing the price of preferred stocks to decline. Preferred stock may have mandatory sinking Company provisions, as well as provisions allowing the stock to be called or redeemed prior to its maturity, which can have a negative impact on the stock's price when interest rates decline. Unlike interest on debt securities, preferred stock dividends are payable only if

declared by the issuer's board. The value of convertible preferred stock can depend heavily upon the value of the security into which such convertible preferred stock is converted, depending on whether the market price of the underlying security exceeds the conversion price.

Real Estate Industry Risk

Issuers principally engaged in real estate industry, including real estate investment trusts, may be subject to risks similar to the risks associated with the direct ownership of real estate, including: (i) changes in general economic and market conditions; (ii) changes in the value of real estate properties; (iii) risks related to local economic conditions, overbuilding and increased competition; (iv) increases in property taxes and operating expenses; (v) changes in zoning laws; (vi) casualty and condemnation losses; (vii) variations in rental income, neighborhood values or the appeal of property to tenants; (viii) the availability of financing and (ix) changes in interest rates and leverage.

REIT-Specific Risk

Real estate investments are subject to various risk factors. Generally, real estate investments could be adversely affected by a recession or general economic downturn where the properties are located. Real estate investment performance is also subject to the success that a particular property manager has in managing the property.

Risks Associated with Options on Securities

There are several risks associated with transactions in options on securities. For example, there are significant differences between the securities and options markets that could result in an imperfect correlation between these markets, causing a given transaction not to achieve its objectives. A transaction in options or securities may be unsuccessful to some degree because of market behavior or unexpected events.

When the Company writes a covered call option, the Company forgoes, during the option's life, the opportunity to profit from increases in the market value of the security covering the call option above the sum of the premium and the strike price of the call, but retains the risk of loss should the price of the underlying security decline. The writer of an option has no control over the time when it may be required to fulfill its obligation and once an option writer has received an exercise notice, it must deliver the underlying security in exchange for the strike price.

When the Company writes a covered put option, the Company bears the risk of loss if the value of the underlying stock declines below the exercise price minus the put premium. If the option is exercised, the Company could incur a loss if it is required to purchase the stock underlying the put option at a

December 31, 2020

NexPoint Strategic Opportunities Fund

price greater than the market price of the stock at the time of exercise plus the put premium the Company received when it wrote the option. While the Company's potential gain in writing a covered put option is limited to distributions earned on the liquid assets securing the put option plus the premium received from the purchaser of the put option, the Company risks a loss equal to the entire exercise price of the option minus the put premium.

Risks of Investing in Obligations of Stressed, Distressed and Bankrupt Issuers

The Company may invest in companies that are troubled, in distress or bankrupt. As such, they are subject to a multitude of legal, industry, market, environmental and governmental forces that make analysis of these companies inherently difficult. Further, the Investment Adviser relies on company management, outside experts, market participants and personal experience to analyze potential investments for the Company. There can be no assurance that any of these sources will prove credible, or that the resulting analysis will produce accurate conclusions.

Risks of Investing in Senior Loans

The risk that the issuer of a senior loan may fail to pay interest or principal when due, and changes in market interest rates may reduce the value of the senior loan or reduce the Company's returns. The risks associated with senior loans are similar to the risks of high yield debt securities. Senior loans and other debt securities are also subject to the risk of price declines and to increases in interest rates, particularly long-term rates. Senior loans are also subject to the risk that, as interest rates rise, the cost of borrowing increases, which may increase the risk of default. In addition, the interest rates of floating rate loans typically only adjust to changes in short-term interest rates; long-term interest rates can vary dramatically from short-term interest rates. Therefore, senior loans may not mitigate price declines in a long-term interest rate environment. The Company's investments in senior loans are typically below investment grade and are considered speculative because of the credit risk of their issuers.

On July 27, 2017, the head of the United Kingdom's Financial Conduct Authority announced a desire to phase out the use of LIBOR by the end of 2021. Due to this announcement, there remains uncertainty regarding the future utilization of LIBOR and the nature of any replacement rate. As such, the potential effect of a transition away from LIBOR on the Company or the financial instruments in which the Company invests cannot yet be determined.

Risks of Non-Diversification and Other Focused Strategies

While the Investment Adviser invests in a number of fixed income and equity instruments issued by different issuers and employs multiple investment strategies with respect to the Company's investment portfolio, it is possible that a significant amount of the Company's investments could be invested in the instruments of only a few companies or other issuers or that at any particular point in time one investment strategy could be more heavily weighted than the others. The focus of the Company's investment portfolio in any one issuer would subject the Trust to a greater degree of risk with respect to defaults by such issuer or other adverse events affecting that issuer, and the focus of the portfolio in any one industry or group of industries would subject the Company to a greater degree of risk with respect to economic downturns relating to such industry or industries. The focus of the Company's investment portfolio in any one investment strategy would subject the Company to a greater degree of risk than if the Company's investment portfolio were varied in its investments with respect to several investment strategies.

Reverse Repurchase Agreement Risk

The Company may enter into reverse repurchase transactions with BNP Securities or other banks and securities dealers. A reverse repurchase transaction is a repurchase transaction in which the Company is the seller of, rather than the investor in, securities or other assets and agrees to repurchase them at a date certain or on demand. Use of a reverse repurchase transaction may be preferable to a regular sale and later repurchase of securities or other assets because it avoids certain market risks and transaction costs. Reverse repurchase transactions involve the risk that the market value of securities and/or other assets purchased by the Company with the proceeds received by the Company in connection with such reverse repurchase transactions may decline below the market value of the securities the Company is obligated to repurchase under such reverse repurchase transactions. They also involve the risk that the counterparty liquidates the securities delivered to it by the Company under the reverse repurchase agreement following the occurrence of an event of default under the reverse repurchase agreement by the Company. At the time when the Company enters into a reverse repurchase transactions, liquid securities (cash, U.S. Government securities or other debt obligations) of the Company having a value at least as great as the Purchase Price of the securities to be purchased will be segregated on the books of the Company throughout the period of the obligation. The use of these investment strategies may increase net asset value fluctuation.

December 31, 2020

NexPoint Strategic Opportunities Fund

Senior Loans Risk

The Company's investments in Senior Loans are typically below investment grade and are considered speculative because of the credit risk of their issuers. As with any debt instrument, Senior Loans are generally subject to the risk of price declines and to increases in interest rates, particularly long term rates. Senior loans are also subject to the risk that, as interest rates rise, the cost of borrowing increases, which may increase the risk of default. In addition, the interest rates of floating rate loans typically only adjust to changes in short-term interest rates; long-term interest rates can vary dramatically from short-term interest rates. Therefore, senior Loans may not mitigate price declines in a rising long term interest rate environment. The secondary market for loans is generally less liquid than the market for higher grade debt. Less liquidity in the secondary trading market could adversely affect the price at which the Company could sell a loan, and could adversely affect the Company's income. The volume and frequency of secondary market trading in such loans varies significantly over time and among loans. Although Senior Loans in which the Company will invest will often be secured by collateral, there can be no assurance that liquidation of such collateral would satisfy the Borrower's obligation in the event of a default or that such collateral could be readily liquidated.

LIBOR is the average offered rate for various maturities of short-term loans between major international banks who are members of the British Bankers Association. LIBOR is the most common benchmark interest rate index used to make adjustments to variable-rate loans. It's used throughout global banking and financial industries to determine interest rates for a variety of financial instruments (such as debt instruments and derivatives) and borrowing arrangements. Due to manipulation allegations in 2012 and reduced activity in the financial markets that it measures, in July 2017, the Financial Conduct Authority, the United Kingdom financial regulatory body, announced a desire to phase out the use of LIBOR by the end of 2021. Please refer to "Interest Rate Risk" for more information.

Short Sales Risk

Short sales by the Company that are not made where there is an offsetting long position in the asset that it is being sold short theoretically involve unlimited loss potential since the market price of securities sold short may continuously increase. Short selling allows the Company to profit from declines in market prices to the extent such decline exceeds the transaction costs and costs of borrowing the securities. However, since the borrowed securities must be replaced by purchases at market prices in order to close out the short position, any appreciation in the price of the borrowed securities would result in a loss. Purchasing securities to close out

the short position can itself cause the price of securities to rise further, thereby exacerbating the loss. The Company may mitigate such losses by replacing the securities sold short before the market price has increased significantly. Under adverse market conditions, the Company might have difficulty purchasing securities to meet margin calls on its short sale delivery obligations, and might have to sell portfolio securities to raise the capital necessary to meet its short sale obligations at a time when fundamental investment considerations would not favor such sales.

If other short positions of the same security are closed out at the same time, a "short squeeze" can occur where demand exceeds the supply for the security sold short. A short squeeze makes it more likely that the Company will need to replace the borrowed security at an unfavorable price.

Structured Finance Securities Risk

A portion of the Company's investments may consist of equipment trust certificates, collateralized mortgage obligations, collateralized bond obligations, collateralized loan obligations or similar instruments. Such structured finance securities are generally backed by an asset or a pool of assets, which serve as collateral. Depending on the type of security, the collateral may take the form of a portfolio of mortgage loans or bonds or other assets. The Company and other investors in structured finance securities ultimately bear the credit risk of the underlying collateral. In some instances, the structured finance securities are issued in multiple tranches, offering investors various maturity and credit risk characteristics, often categorized as senior, mezzanine and subordinated/equity according to their degree of risk. The riskiest securities are the equity tranche, which bears the bulk of defaults from the bonds or loans serving as collateral, and thus may protect the other, more senior tranches from default. If there are defaults or the relevant collateral otherwise underperforms, scheduled payments to senior tranches of such securities take precedence over those of mezzanine tranches, and scheduled payments to mezzanine tranches take precedence over those to subordinated/equity tranches. A senior tranche typically has higher ratings and lower yields than the underlying securities, and may be rated investment grade. Despite the protection from the equity tranche, other tranches can experience substantial losses due to actual defaults, increased sensitivity to defaults due to previous defaults and the disappearance of protecting tranches, market anticipation of defaults and aversion to certain structured finance securities as a class.

Gain Contingency

Claymore Holdings, LLC, a partially-owned affiliate of the Company, is engaged in ongoing litigation that could result in a possible gain contingency to the Company. The probability,

NOTES TO FINANCIAL STATEMENTS (continued)

December 31, 2020

NexPoint Strategic Opportunities Fund

timing, and potential amount of recovery, if any, are unknown.

Valuation Risk

Certain of the Company's assets are fair valued, including the Company's investment in equity issued by TerreStar Corporation ("TerreStar"). TerreStar is a nonoperating company that does not currently generate substantial revenue and which primarily derives its value from licenses for use of two spectrum frequencies, the license with respect to one of which was granted a conditional waiver by the FCC on April 30, 2020. The fair valuation of TerreStar involved sig-

nificant uncertainty as it is materially dependent on estimates of the value of both spectrum licenses.

Note 10. Investment Transactions Purchases & Sales of Securities

The cost of purchases and the proceeds from sales of investments, other than short-term securities, for the period ended December 31, 2020, were as follows:

Purchases	Sales
\$188,597,294	\$465,326,197

Note 11. Affiliated Issuers

Under Section 2(a)(3) of the 1940 Act, as amended, a portfolio company is defined as "affiliated" if a Fund owns five percent or more of its outstanding voting securities or if the portfolio company is under common control. The table below shows affiliated issuers of the Company as of December 31, 2020:

Issuer	Shares at December 31, 2019	Beginning Value as of December 31, 2019	Purchases at Cost	Proceeds from Sales	Distribution to Return of Capital	Net Realized Gain/Loss on the Sales of Affiliated Issuers	Change Unrealized Appreciation/ Depreciation	Ending Value as of December 31, 2020	Shares at December 31, 2020	Affiliated Income

The Investment Adviser has historically been affiliated through common control with Highland Capital Management, L.P. (“HCMLP”), an SEC-registered investment adviser that filed for Chapter 11 bankruptcy protection on October 16, 2019. On January 9, 2020, the United States Bankruptcy Court for the Northern District of Texas (the “Court”) approved a change of control of HCMLP, which involved the resignation of James Dondero as the sole director of, and the appointment of an independent board to, HCMLP’s general partner. On October 9, 2020, Mr. Dondero resigned as an employee of HCMLP and as portfolio manager for all HCMLP-advised funds. As a result of these changes, the Adviser is no longer under common control or otherwise affiliated with HCMLP. Mr. Dondero continues to be a portfolio manager for the Investment Adviser and the Company.

On November 13, 2020, HCMLP filed an amended plan of reorganization and disclosure statement with the Court (the “Amended Plan”), which was subsequently approved by the Creditors and confirmed (subject to final order) by the Court. On November 30, 2020, HCMLP provided notice of termination of the Shared Services Agreement with the Investment Adviser, through which HCMLP had provided support services to the Adviser. The Shared Services Agreement was terminated effective February 19, 2021. However, the Investment Adviser expects to be able to continue to continue to provide the required advisory and support services to the Company through a transfer of personnel, equipment and/or facilities from HCMLP either to the Investment Adviser or to a third-party service provider.

Note 12. Rights Offering

On April 11, 2019, the Company announced a non-transferable rights offering (the “2019 Offering”) to purchase additional shares of common stock of the Company. Each shareholder of record on April 29, 2019 received one right for each common share held. Holders were entitled to purchase one new share of common stock for every three rights held at a subscription price of \$17.77 per share, which was calculated as the lesser of (1) 95% of the reported net asset value on May 22, 2019 (the “2019 Expiration Date”), or (2) 95% of the average of the last reported sales price of the Company’s common shares on NYSE on the 2019 Expiration Date and on each of the four trading days preceding the 2019 Expiration Date. The 2019 Offering was oversubscribed, with total subscriptions equal to 231% of the primary offering. As a result of the 2019 Offering and the Company’s exercise of an over-allotment option, 13,498,570 additional shares were issued.

Note 13. New Accounting Pronouncements

In August 2018, the FASB issued Accounting Standards Update 2018-13, Fair Value Measurement (Topic 820). The new guidance includes additions and modifications to disclosures requirements for fair value measurements. For public entities, the amendments are effective for consolidated financial statements issued for fiscal years beginning after December 15, 2019, and interim periods

NOTES TO FINANCIAL STATEMENTS (continued)

December 31, 2020

within those fiscal years. This new guidance and the adoption of this guidance within these financial statements did have a material impact on the Company's financial statements.

Note 14. Unconsolidated Significant Subsidiaries

In accordance with Regulation S-X and GAAP, the Company is not permitted to consolidate any subsidiary or other entity that is not an investment company, including those in which the Company has a controlling interest unless the business of the controlled subsidiary consists of providing services to the Company. In accordance with Regulation S-X Rules 3-09 and 4-08(g), the Company evaluates its unconsolidated controlled subsidiaries as significant subsidiaries under the respective rules. As of December 31, 2020, NexPoint Real Estate Opportunities, LLC was considered a significant unconsolidated subsidiary under Regulation S-X Rule 4-08(g), while NexPoint Real Estate Capital, LLC and Specialty Financial Products Designated Activity Company did not meet the qualifications of a significant subsidiary. All subsidiaries are wholly owned by the Company. Based on the requirements under Regulation S-X Rule 4-08(g), the summarized consolidated financial information of these unconsolidated subsidiaries is presented below:

	NexPoint Real Estate Capital, LLC December 31, 2020	NexPoint Real Estate Opportunities, LLC December 31, 2020	Specialty Financial Products Designated Activity Company December 31, 2020

Note 15. Subsequent Events

The Investment Adviser has evaluated the impact of all subsequent events on the Company through the date the consolidated financial statements were issued, and has determined that there were no such subsequent events to report which have not already been recorded or disclosed in these financial statements and accompanying notes except as noted below.

On January 8, 2021, the Company announced the final results of its Exchange Offer, pursuant to which the Company purchased the Company's Common Shares in exchange for consideration consisting of approximately 20% cash and 80% newly-issued 5.50% Series A Cumulative Preferred Shares, liquidation preference \$25.00 per share ("Series A Preferred Shares"). The Series A Preferred Shares were listed on the New York Stock Exchange (NYSE: NHF PR A) on January 8, 2021.

Pursuant to the terms of the Exchange Offer, the Company purchased 8,750,121.132 Common Shares at a price of \$12.00 per Common Share, for an aggregate purchase price of approximately \$105 million.

As part of the Exchange Offer consideration, the Company issued 3,359,593 Series A Preferred Shares, with an aggregate liquidation preference of \$83,989,825. The remainder of the Exchange Offer consideration consisted of approximately \$21 million in cash.

Egan-Jones Ratings Company assigned an investment grade corporate rating of BBB- to the Series A Preferred Shares and a rating of BBB to the Company.

December 31, 2020

NexPoint Strategic Opportunities Fund

Dividends and distributions on the Series A Preferred Shares are cumulative from their original issue date at the annual rate of 5.50% of the \$25.00 per share liquidation preference and will be payable quarterly on March 31, June 30, September 30 and December 31 of each year, beginning with the first payment on March 31, 2021.

On January 8, 2021, the Company entered into a short-term credit agreement (the "Credit Agreement") with Raymond James Bank, N.A. ("Raymond James") whereby Raymond James agreed to loan the Company up to \$30,000,000 until July 8, 2021, with interest paid at a rate of LIBOR + 3.50%. The Company paid a commitment fee of \$600,000 to Raymond James as a condition to closing.

On March 1, 2021, the Company entered into a waiver and forbearance agreement to the Revolving Credit Agreement pursuant to which the Company agreed to a payment to reduce the aggregate Commitments, and Key-Bank agreed to waive an Existing Default (as defined in the Revolving Credit Agreement). This allows the borrower an opportunity to negotiate a more permanent modification of the Revolving Credit Agreement.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Shareholders and Board of Trustees of NexPoint Strategic Opportunities Fund

Opinion on the Financial Statements

We have audited the accompanying statement of assets and liabilities, including the investment portfolio, of NexPoint Strategic Opportunities Fund (the “Fund”) as of December 31, 2020, the related statements of operations, cash flows, and changes in net assets, the related notes, and the financial highlights for the year then ended (collectively referred to as the “financial statements”). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Fund as of December 31, 2020, the results of its operations and its cash flows, the changes in net assets, and the financial highlights for the year then ended, in conformity with accounting principles generally accepted in the United States of America.

The Fund’s financial statements and financial highlights for the years ended December 31, 2019, and prior, were audited by other auditors whose report dated April 10, 2020, expressed an unqualified opinion on those financial statements and financial highlights.

Basis for Opinion

These financial statements are the responsibility of the Fund’s management. Our responsibility is to express an opinion on the Fund financial statements based on our audit. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (“PCAOB”) and are required to be independent with respect to the Fund in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement whether due to error or fraud.

Our audit included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our procedures included confirmation of securities owned as of December 31, 2020, by correspondence with the custodian, agent banks, transfer agents, issuers and brokers; when replies were not received from brokers, we performed other auditing procedures. Our audit also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audit provides a reasonable basis for our opinion.

We have served as the auditor of one or more of NexPoint Advisors, L.P.’s investment companies since 2018.

COHEN & COMPANY, LTD.
Cleveland, Ohio

ADDITIONAL INFORMATION (unaudited)

December 31, 2020

NexPoint Strategic Opportunities Fund

Investment Objective and Strategy Overview

At a special meeting of shareholders on August 28, 2020, shareholders approved proposals (i) to change the Company's business from a registered investment company that invests primarily in debt and equity securities to a diversified REIT, (ii) to amend the Company's fundamental investment restrictions to permit the Company to engage in its new business (collectively, the "Conversion"), and (iii) to amend and restate the Company's Agreement and Declaration of Trust. Although the Company has begun taking steps to implement the Conversion, it is still contingent upon regulatory approval and the ability to reconfigure the Company's portfolio to attain REIT status and deregister as an investment company.

The Adviser has begun to realign the Company's portfolio so that it is no longer an investment company under the 1940 Act and anticipates filing an application with the Securities Exchange Commission, or the SEC, for a deregistration order in the first quarter of 2021. The Adviser intends to sell certain of the Company's existing investments and transition its portfolio into real estate and real estate related investments as opportunities within the new investment scope arise, subject to applicable compliance requirements and other business considerations.

Once the Conversion is fully implemented, it is expected that investments will be diversified among various commercial real estate property types and across the capital structure, including but not limited to: equity, mortgage debt, mezzanine debt and preferred equity. It is expected that property types will primarily include industrial, hospitality, net lease, retail, office, storage and healthcare and, to the extent currently owned, multifamily and single-family rentals; however, the Company would have the authority to invest without limitation in any property type.

The Company will invest primarily in real estate and real estate related assets; however, the Company may, to a limited extent, continue to hold, acquire or transact in certain non-real estate securities. To permit the Company to engage in its new business, the Company's fundamental investment restrictions regarding purchasing and selling real estate and originating loans and certain of the Company's fundamental investment restrictions have been amended to allow the Company to engage in its business as a diversified REIT.

The following discussion reflects the Company's investment strategy and policies as modified pursuant to shareholder approval on August 28, 2020. The following information is a summary of the changes approved by shareholders. This information may not reflect all of the changes that have occurred since you purchased Common Shares. Additional detail regarding these changes is available in the Company's definitive proxy statement filed on July 10, 2020.

Investment Strategy

As a diversified REIT, the Company's primary investment objective will be to provide both current income and capital appreciation. The Company will seek to achieve this objective by investing among various commercial real estate property types and across the capital structure, including but not limited to: equity, mortgage debt, mezzanine debt and preferred equity. The Investment Adviser will focus on opportunistic investments in real estate properties with a value-add component and real estate credit. The objective will be to increase the cash flow and value of the Company's properties, acquire properties with cash flow growth potential and achieve capital appreciation for shareholders through a value-add program. The Company will pursue real estate credit investments based on where the Investment Adviser believes the various real estate subsectors are within the broader real estate cycle and tactically allocate among these opportunities.

Underlying property types will primarily include industrial, hospitality, net lease, retail, office, storage and healthcare and, to the extent currently owned, multifamily and single-family rentals; however, the Company may invest without limitation in any property type.

The Company will invest primarily in real estate and real estate related assets; however, the Company may, to a limited extent, continue to hold, acquire or transact in certain non-real estate securities.

The Investment Adviser believes that a diversified investment approach is appropriate for the current market environment. However, to capitalize on investment opportunities at different times in the economic and real estate investment cycle, the Company may change its investment strategy from time to time. The Investment Adviser believes that the flexibility of the Company's investment strategy and the experience and resources of the Investment Adviser and its affiliates, will allow the Company to take advantage of changing market conditions to provide both current income and generate capital appreciation.

Leverage Policies and Financing Strategy. To increase the returns on the Company's investments, after issuance of the Deregistration Order, the Company plans to employ both direct and structural leverage on the Company's property and debt investments, which we expect generally will not exceed, on a debt to equity basis, a ratio of 3-to-1, an increase from the ratio of 1-to-2 set by the 1940 Act.

Leverage will take the form of repurchase or margin facilities collateralized by our debt investments and mortgage debt collateralized by our property investments. At the REIT level the Company may have a revolving corporate credit facility, or may issue unsecured debt, mezzanine debt or preferred

ADDITIONAL INFORMATION (unaudited) (continued)

December 31, 2020

equity. The Company believes that the relationships the Investment Adviser and its affiliates, as well as other companies managed by the Investment Adviser's affiliates (the "NexPoint managed companies"), have with banks, life insurance companies, Freddie Mac and The Federal National Mortgage Association, or Fannie Mae, provide the Company with a unique opportunity to invest alongside quality sponsors and the largest multifamily lenders in the U.S.

The Company intends to use leverage, to the extent available, to make additional investments that may increase the Company's potential returns. Although the Company is not required to maintain any particular leverage ratio, the amount of leverage the Company will use for particular investments will depend upon an assessment of a variety of factors, which may include the anticipated liquidity and price volatility of the Company's assets, the potential for losses in the Company's portfolio, the gap between the duration of the Company's assets and liabilities, the availability and cost of financing the Company's assets, the health of the U.S. economy and commercial real estate markets, the Company's outlook for the level, slope and volatility of future interest rates, the credit quality of the Company's borrowers and tenants, the collateral values underlying the Company's assets and the Company's outlook for market lending spreads relative to the LIBOR (or other applicable benchmark interest rate index) curve.

REIT Operations. The Company intends to operate to ensure that it establishes and maintains its qualification as a REIT for U.S. federal tax purposes and is not required to register as an investment company under the 1940 Act. The Company intends to regularly monitor the nature of the Company's assets and the income they generate to ensure that at all times the Company maintain its tax qualification as a REIT and is not required to register as an investment company under the 1940 Act.

Distribution Policy. The Company intends to make monthly distributions to the Company's shareholders of amounts that will, at a minimum, enable the Company to comply with the REIT provisions of the Code that generally require annual distributions of at least 90% of the Company's REIT taxable income (other than net capital gains). The actual amount of such distributions will be determined on a monthly basis by the Board, taking into account, in addition to the REIT tax requirements, the Company's cash needs, the market price for the Company's Common Shares and other factors our Board considers relevant.

Operating Expenses. Operating expenses may increase as the Conversion becomes fully implemented following receipt of the Deregistration Order due to increased costs associated with sourcing additional real estate investments and costs associated with servicing those investments; however, these expenses are projected to be offset by higher projected

NexPoint Strategic Opportunities Fund

income attributable to increased cash flows from leveraged real estate assets, resulting in higher projected net income per common share (thus supporting a potentially higher distribution rate in the long term).

During the Conversion period, the Investment Adviser will continue to implement the Company's business strategies subject to the oversight of the Board, including: (a) performing all of our day-to-day activities as a public company operating as a diversified REIT; (b) sourcing, analyzing and closing the Company's investments; (c) arranging the Company's financings; (d) performing the Company's asset management functions by monitoring the performance of the Company's borrowers and the maintenance of the Company's collateral; and (e) when necessary, enforcing the Company's loan and security rights.

Policies with Respect to Certain Other Activities. The Company may raise additional funds through offerings of equity or debt securities or by retaining cash flow (subject to provisions in the Code concerning distribution requirements and the taxability of undistributed REIT taxable income) or a combination of these methods. If the Board determines to raise additional equity capital, it has the authority, without shareholder approval, to issue additional Common Shares or preferred shares of beneficial interest in any manner and on such terms and for such consideration as it deems appropriate, at any time.

In addition, to the extent available, the Company intends to borrow money to make investments that may increase the Company's potential returns. The Company intends to use traditional forms of financing, including repurchase agreements, bank credit facilities (including revolving facilities and term loans), public or private debt issuances, securitizations and other sources of financing. The Company may also issue preferred equity which requires us to pay dividends at fixed or variable rates before we may pay distributions to our common shareholders. We expect that the Board will periodically review the Company's investment guidelines and our portfolio and leverage strategies.

The Company may invest in equity or debt securities of other REITs or other entities engaged in real estate operating or financing activities, and may do so for the purpose of exercising control over such entities.

The Company does not intend to adopt a formal portfolio turnover policy. Subject to maintaining the Company's qualification for taxation as a REIT under the Code for U.S. federal income tax purposes and our exemption from registration under the 1940 Act, the Company currently expects that it will typically hold investments for between two and 10 years. However, in order to maximize returns and manage portfolio risk while maintaining the financial capacity to undertake attractive opportunities that become available to

ADDITIONAL INFORMATION (unaudited) (continued)

December 31, 2020

the Company, the Company may dispose of an asset earlier than anticipated or hold an investment longer than anticipated if we determined doing so to be appropriate based upon market conditions or other factors regarding a particular investment.

Additional Portfolio Information

The Investment Adviser and its affiliates manage other accounts, including registered and private funds and individual accounts. Although investment decisions for the Company are made independently from those of such other accounts, the Investment Adviser may, consistent with applicable law, make investment recommendations to other clients or accounts that may be the same or different from those made to the Company, including investments in different levels of the capital structure of a company, such as equity versus senior loans, or that involve taking contradictory positions in multiple levels of the capital structure. The Investment Adviser has adopted policies and procedures that address the allocation of investment opportunities, execution of portfolio transactions, personal trading by employees and other potential conflicts of interest that are designed to ensure that all client accounts are treated equitably over time. Nevertheless, this may create situations where a client could be disadvantaged because of the investment activities conducted by the Investment Adviser for other client accounts. When the Company and one or more of such other accounts is prepared to invest in, or desires to dispose of, the same security, available investments or opportunities for each will be allocated in a manner believed by the Investment Adviser to be equitable to the Company and such other accounts. The Investment Adviser also may aggregate orders to purchase and sell securities for the Company and such other accounts. Although the Investment Adviser believes that, over time, the potential benefits of participating in volume transactions and negotiating lower transaction costs should benefit all accounts including the Company, in some cases these activities may adversely affect the price paid or received by the Company or the size of the position obtained or disposed of by the Company.

Tax Information

For shareholders that do not have a December 31, 2020 tax year end, this notice is for informational purposes only. For shareholders with a December 31, 2020 tax year end, please consult your tax adviser as to the pertinence of this notice. For the fiscal year ended December 31, 2020, the Company hereby designates the following items with regard to distributions paid during the year.

NexPoint Strategic Opportunities Fund

Return of Capital	Ordinary Income Distribution	Total Distribution	
74.77%	25.23%	100.00%	
Dividend Received Deduction ⁽¹⁾	Qualified Dividend Income ⁽²⁾	U.S. Government Interest ⁽³⁾	Interest Related Dividends ⁽⁴⁾
0.38%	0.76%	0.00%	41.13%
Short-Term Capital Gain Dividends ⁽⁵⁾		Qualifying Business Income ⁽⁶⁾	
0.00%		18.67%	

- (1) Qualifying dividends represent dividends which qualify for the corporate dividends received deduction and is reflected as a percentage of ordinary income distributions (the total of short-term capital gain and net investment income distributions).
- (2) The percentage in this column represents the amount of "Qualifying Dividend Income" as created by the Jobs and Growth Tax Relief Reconciliation Act of 2003 and is reflected as a percentage of ordinary income distributions (the total of short-term capital gain and net investment income distributions). It is the intention of the aforementioned Company to designate the maximum amount permitted by law.
- (3) "U.S. Government Interest" represents the amount of interest that was derived from direct U.S. Government obligations and distributed during the fiscal year. This amount is reflected as a percentage of ordinary income. Generally, interest from direct U.S. Government obligations is exempt from state income tax. Shareholder who are residents of California, Connecticut and New York, these funds have not met the statutory requirements to permit exemption of these amounts from state income tax.
- (4) The percentage in this column represents the amount of "Interest Related Dividends" as created by the American Jobs Creation Act of 2004 and is reflected as a percentage of net investment distributions that is exempt from U.S. withholding tax when paid to foreign investors.
- (5) The percentage in this column represents the amount of "Short-Term Capital Gain Dividend" as created by the American Jobs Creation Act of 2004 and is reflected as a percentage of short-term capital gain distributions that is exempt from U.S. withholding tax when paid to foreign investors.
- (6) The percentage in this column represents the amount of ordinary dividend income that qualified for 20% Business Income Deduction.

The information herein may differ from the information and distributions taxable to the shareholder from the calendar year ended December 31, 2020. Complete information will be computed and reported with your 2020 Form 1099-DIV.

Change in Independent Registered Public Accounting Firms

On June 8, 2020, the Company dismissed PricewaterhouseCoopers LLP ("PwC") as the Company's independent registered public accounting firm, effective on such date. The decision to dismiss PwC was approved by the audit committee and by the full Board. On June 18, 2020, the Company approved the appointment of Cohen & Company Ltd. ("Cohen") as the Company's independent registered public accounting firm. Cohen was engaged by the Company on June 25, 2020.

ADDITIONAL INFORMATION (unaudited) (continued)

December 31, 2020

PwC's report on the financial statements for the fiscal years ended December 31, 2019 and December 31, 2018 did not contain any adverse opinion or a disclaimer of opinion, and was not qualified or modified as to uncertainty, audit scope, or accounting principles.

During the Company's fiscal years ended December 31, 2019 and December 31, 2018 and the subsequent interim period through June 8, 2020, during which PwC served as the Company's independent registered public accounting firm, there were no: (1) disagreements (as defined in Item 304(a)(1)(iv) of Regulation S-K and the related instructions) with PwC on any matter of accounting principles or practices, financial statement disclosure, or auditing scope or procedures, which disagreements if not resolved to their satisfaction would have caused them to make reference in connection with their opinion to the subject matter of the disagreement, or (2) reportable events (as described in Item 304(a)(1)(v) of Regulation S-K).

The Company provided PwC with a copy of the disclosures proposed to be made in this N-CSR and requested that PwC furnish the Company with a letter addressed to the Commission stating whether it agrees with the statements made by the Company in response to Item 304(a) of Regulation S-K, and, if not, stating the respects in which it does not agree. The PwC letter is attached hereto to as an exhibit.

During the fiscal years ended December 31, 2019 and December 31, 2018 and the subsequent interim period through June 8, 2020, neither Management, the Company nor anyone on its behalf, consulted Cohen regarding either (i) the application of accounting principles to a specified transaction, either completed or proposed, or the type of audit opinion that might be rendered on the financial statements of the Company and no written report or oral advice was provided to the Company by Cohen or (ii) any matter that was either the subject of a disagreement (as defined in Item 304(a)(1)(iv) of Regulation S-K and the related instructions) or a reportable event (as described in Item 304(a)(1)(v) of Regulation S-K).

Dividend Reinvestment Plan

Unless the registered owner of Common Shares elects to receive cash by contacting Maxim Group LLC ("Maxim" or the "Plan Agent"), as agent for shareholders in administering the Plan, a registered owner will receive newly issued Common Shares for all dividends declared for Common Shares of the Company. If a registered owner of Common Shares elects not to participate in the Plan, they will receive all dividends in cash paid by check mailed directly to them (or, if the shares are held in street or other nominee name, then to such nominee) by Maxim, as dividend disbursing agent. Shareholders may elect not to participate in the Plan and to receive all dividends in cash by sending written

NexPoint Strategic Opportunities Fund

instructions or by contacting Maxim, as dividend disbursing agent, at the address set forth below.

Participation in the Plan is completely voluntary and may be terminated or resumed at any time without penalty by contacting the Plan Agent before the dividend record date; otherwise such termination or resumption will be effective with respect to any subsequently declared dividend. Some brokers may automatically elect to receive cash on the shareholders' behalf and may reinvest that cash in additional Common Shares of the Company for them. The Plan Agent will open an account for each shareholder under the Plan in the same name in which such shareholder's Common Shares are registered.

Whenever the Company declares a dividend payable in cash, non-participants in the Plan will receive cash and participants in the Plan will receive the equivalent in Common Shares. The Common Shares will be acquired by the Plan Agent through receipt of additional unissued but authorized Common Shares from the Company ("newly issued Common Shares"). The number of newly issued Common Shares to be credited to each participant's account will be determined by dividing the dollar amount of the dividend by the lesser of (i) the net asset value per Common Share determined on the Declaration Date and (ii) the market price per Common Share as of the close of regular trading on the New York Stock Exchange (the "NYSE") on the Declaration Date.

The Plan Agent maintains all shareholders' accounts in the Plan and furnishes written confirmation of all transactions in the accounts, including information needed by shareholders for tax records. Common Shares in the account of each Plan participant will be held by the Plan Agent on behalf of the Plan participant, and each shareholder proxy will include those shares purchased or received pursuant to the Plan. The Plan Agent will forward all proxy solicitation materials to participants and vote proxies for shares held under the Plan in accordance with the instructions of the participants. In the case of shareholders such as banks, brokers or nominees which hold shares for others who are the beneficial owners, the Plan Agent will administer the Plan on the basis of the number of Common Shares certified from time to time by the record shareholder's name and held for the account of beneficial owners who participate in the Plan. There will be no brokerage charges with respect to Common Shares issued directly by the Company.

The automatic reinvestment of dividends will not relieve participants of any federal, state or local income tax that may be payable (or required to be withheld) on such dividends. Accordingly, any taxable dividend received by a participant that is reinvested in additional Common Shares will be subject to federal (and possibly state and local) income tax even though such participant will not receive a corresponding amount of cash with which to pay such taxes.

ADDITIONAL INFORMATION (unaudited) (continued)

December 31, 2020

Participants who request a sale of shares through the Plan Agent are subject to a \$2.50 sales fee and pay a brokerage commission of \$0.05 per share sold. The Company reserves the right to amend or terminate the Plan. There is no direct service charge to participants in the Plan; however, the Company reserves the right to amend the Plan to include a service charge payable by the participants. All correspondence concerning the Plan should be directed to the Plan Agent at American Stock Transfer & Trust Company, LLC 6201 15th Avenue Brooklyn, NY 11219; telephone (718) 921-8200.

Shareholder Loyalty Program

To promote loyalty and long-term alignment of interests among the Company's shareholders, the Investment Adviser offers an incentive to shareholders that buy and hold the Company's common shares for a period of at least twelve months through its Shareholder Loyalty Program (the "Program"). To participate in the Program, existing shareholders must open an account (the "Account") with the Program's administrator, American Stock Transfer & Trust Company ("AST"). Subsequently, if a participant makes contributions to the Account during a defined trading period to purchase shares, the Investment Adviser will make a corresponding contribution equal to 2% of the participant's contributions. For example, if a participant contributes \$10,000 to the Account during a defined trading period to purchase shares, the Adviser will make a corresponding contribution of \$200, to purchase additional shares for the participant (the "Bonus Shares"). In addition, Program participants will not be required to pay any customary selling commissions or distribution fees on the purchase of shares under the Program. The Investment Adviser will bear the costs of brokerage fees in connection with the Program. While the portion of the Company's common shares that are acquired through the participant's contribution will vest immediately, Bonus Shares will not vest until the first anniversary of the date that the Bonus Shares were purchased. Vested shares will be held in the Account and Bonus Shares will be held in an account at AST for the conditional benefit of the shareholder. Under the Program, participants must purchase a minimum of \$10,000 worth of shares in the initial subscription and \$5,000 in each subsequent subscription, unless the Investment Adviser, in its sole discretion, decides to permit subscriptions for a lesser amount. If the Company's common shares are trading at a discount, AST will purchase common shares on behalf of participants in open-market purchases. If the Company's common shares are trading at a premium, AST may purchase common shares on behalf of participants in open market purchases or the Company may sell common shares to the Shareholder Loyalty Program by means of a prospectus or otherwise. All dividends received on shares that are

NexPoint Strategic Opportunities Fund

purchased under the Program will be automatically reinvested through the Program. A participant's interest in a dividend paid to the holder of a vested share will vest immediately. A participant's interest in a dividend paid to the holder of a Bonus Share will vest at the same time that the Bonus Share's vesting requirements are met. In addition, for dividends paid to holders of shares that were purchased with a participant's contributions, the Investment Adviser will make a corresponding contribution to the amount of the reinvested dividend equal to 2% of the dividend amount. AST maintains all shareholders' accounts in the Program and furnishes written confirmation of all transactions in the accounts, including information needed by shareholders for tax records. Shares in the account of each Program participant will be held by AST on behalf of the Program participant, and each shareholder proxy will include those shares purchased or received pursuant to a Program. AST will forward all proxy solicitation materials to participants and vote proxies for shares held under the Program in accordance with the instructions of the participants. In the case of shareholders such as banks, brokers or nominees which hold shares for others who are the beneficial owners, AST will administer the Program on the basis of the number of common shares certified from time to time by the record shareholder's name and held for the account of beneficial owners who participate in the Program. The Company and the Investment Adviser reserve the right to amend or terminate the Program. To help align the interests of the Investment Adviser's employees with the interests of the Company's shareholders, the Investment Adviser offers a similar program to its employees. Participants in the Program should be aware that their receipt of Bonus Shares under the Program constitutes taxable income to them. In addition, such participants owe taxes on that portion of any distribution that constitutes taxable income in respect of shares of our common stock held in their Program accounts, whether or not such shares of common stock have vested in the hands of the participants. To the extent any payments or distributions under the Program are subject to U.S. federal, state or local taxes, the Company, any participating affiliate of the Company or the agent for the Program may satisfy its tax withholding obligation by (1) withholding shares of Stock allocated to the participant's account, (2) deducting cash from the participant's account or (3) deducting cash from any other compensation the participant may receive. Program participants should consult their tax advisers regarding the tax consequences to them of participating in the Program. The Program may create an incentive for shareholders to invest additional amounts in the Company. Because the Investment Adviser's management fee is based on a percentage of the assets of the Company, the Program will result in increased net revenues to the Investment Adviser if the increase in the management fee due to the

ADDITIONAL INFORMATION (unaudited) (continued)

December 31, 2020

increased asset base offsets the costs associated with establishing and maintaining the Program.

Approval of NexPoint Strategic Opportunities Fund Investment Advisory Agreement

The Company has retained NexPoint Advisors, L.P. (the "Investment Adviser") to manage the assets of the Company pursuant to an investment advisory agreement between the Investment Adviser and the Company (the "Agreement"). The Agreement has been approved by the Company's Board of Trustees, including a majority of the Independent Trustees. The Agreement continues in effect from year-to-year, provided that such continuance is specifically approved at least annually by the vote of holders of at least a majority of the outstanding shares of the Company or by the Board of Trustees and, in either event, by a majority of the Independent Trustees of the Company casting votes in person at a meeting called for such purpose. On March 25, 2020, as a result of health and safety measures put in place to combat the global COVID-19 pandemic, the Securities and Exchange Commission issued an exemptive order (the "Order") pursuant to Sections 6(c) and 38(a) of the Investment Company Act of 1940, as amended (the "1940 Act"), that temporarily exempts registered investment management companies from the in-person voting requirements under the 1940 Act, subject to certain requirements, including that votes taken pursuant to the Order are ratified at the next in-person meeting. The Board determined that reliance on the Order was necessary or appropriate due to the circumstances related to current or potential effects of COVID-19 and therefore, the Board's October 28, 2020 meeting was held telephonically in reliance on the Order.

During a telephonic meeting held on August 13, 2020, the Board of Trustees gave preliminary consideration to information bearing on the continuation of the Agreement for a one-year period commencing November 1, 2020 with respect to the Company. The primary objective of the meeting was to ensure that the Trustees had the opportunity to consider matters they deemed relevant in evaluating the continuation of the Agreement, and to request any additional information they considered reasonably necessary for their deliberations. The Board received additional follow up information and presentations from the Investment Adviser at multiple meetings, which the Board took into account in connection with their consideration of the renewal of the Agreement, including at meetings held on September 17-18, 2020, September 23, 2020 and October 13, 2020. [K&L/SEI please confirm this reflects all dates Board met and received follow up 15(c) discussions- we think there may have been one or two more.] The Board also received regular updates on the HCMLP bankruptcy and services being provided under the Shared Services Agreement.

NexPoint Strategic Opportunities Fund

At a meeting held on October 28, 2020, the Board of Trustees, including the Independent Trustees, approved the continuance of the Agreement for a one-year period commencing on November 1, 2020. As part of its review process, the Board requested, through its independent legal counsel, and received from the Investment Adviser, various information and written materials, including: (1) information regarding the financial soundness of the Investment Adviser and the profitability of the Advisory Agreement to the Investment Adviser; (2) information on the advisory, legal and compliance personnel of the Investment Adviser, including compensation arrangement; (3) information on the internal compliance procedures of the Investment Adviser, including policies and procedures for personal securities transactions, conflicts of interest and with respect to cybersecurity, business continuity and disaster recovery; (4) comparative information showing how the Company's fees and expenses compare to those of other registered investment companies and comparable funds managed by the Investment Adviser that follow investment strategies similar to those of the Company, if any; (5) information regarding the investment performance of the Company, including comparisons of the Company's performance against that of other registered investment companies and comparable funds managed by the Investment Adviser that follow investment strategies similar to the Company, if any; (6) information regarding brokerage and portfolio transactions; and (7) information on any legal proceedings or regulatory audits or investigations affecting the Investment Adviser or its affiliates. Throughout the contract renewal process, the Trustees requested that the Investment Adviser provide additional information regarding various matters. In addition, the Independent Board of Trustees received an independent report from FUSE Research Network ("FUSE"), an independent third-party provider of investment company data, relating to the Company's performance and expenses compared to the performance and expenses of a group of funds deemed by FUSE to be comparable to the Company (the "peer group"), and to a larger group of comparable funds (the "peer universe"). The Board also received data relating to the Company's leverage, discounts and distribution rates as compared to its peer group.

The Board of Trustees' evaluation process with respect to the Investment Adviser is an ongoing one. In this regard, the Board of Trustees also took into account discussions with management and information provided to the Board of Trustees at periodic meetings of the Board of Trustees over the course of the year with respect to the services provided by the Investment Adviser to the Company, including quarterly performance reports prepared by management containing reviews of investment results and prior presentations from the Investment Adviser with respect to the Company. The information received and considered by the

ADDITIONAL INFORMATION (unaudited) (continued)

December 31, 2020

Board of Trustees in connection with the October 28, 2020 meeting and throughout the year was both written and oral.

The Board of Trustees reviewed various factors that were discussed in a legal memorandum provided by independent counsel regarding trustee responsibilities in considering the Advisory Agreement, the detailed information provided by the Investment Adviser and other relevant information and factors. The Board of Trustees also considered other factors (including conditions and trends prevailing generally in the economy, the securities markets, and the effect of the COVID-19 pandemic on the Company, and the industry). The Board of Trustees' conclusions as to the approval of the Advisory Agreement were based on a comprehensive consideration of all information provided to the Trustees without any single factor being dispositive in and of itself.

Some of the factors that figured particularly in the Board of Trustees' deliberations are described below, although individual Trustees may have evaluated the information presented differently from one another, giving different weights to various factors. In addition, the Board of Trustees' conclusions may be based in part on its consideration of the advisory arrangements in prior years and on the Board's ongoing regular review of fund performance and operations throughout the year.

Throughout the process, the Board of Trustees had the opportunity to ask questions of and request additional information from the Investment Adviser. The Board of Trustees was assisted by legal counsel for the Trust and the Independent Trustees were also separately assisted by independent legal counsel throughout the process. The Board also met separately without representatives of the Investment Adviser present. The Independent Trustees also were advised by and met in executive sessions with their independent legal counsel at which no representatives of management were present to discuss the proposed continuation of the Advisory Agreement, including prior to the October 28, 2020 meeting.

The nature, extent, and quality of the services to be provided by the Investment Adviser

The Board considered the portfolio management services to be provided by the Investment Adviser under the Advisory Agreement and the activities related to portfolio management, including use of technology, research capabilities and investment management staff. The Board considered the relevant experience and qualifications of the personnel who would provide advisory services, including the background and experience of the members of the Company's portfolio management team. The Trustees reviewed the management structure, assets under management and investment philosophies and processes of the Investment Adviser, including with respect to liquidity

NexPoint Strategic Opportunities Fund

management. The Board also reviewed and discussed information regarding the Investment Adviser's compliance policies, procedures and personnel, including compensation arrangements and with respect to valuation, cybersecurity, business continuity and disaster recovery. The Board also considered the Investment Adviser's risk management and monitoring processes. The Board of Trustees took into account the terms of the Advisory Agreement and considered that, the Investment Adviser, subject to the direction of the Board of Trustees, is responsible for providing advice and guidance with respect to the Company and for managing the investment of the assets of the Company. The Board of Trustees also took into account that the scope of services provided by the Investment Adviser and the undertakings required of the Investment Adviser in connection with those services, including maintaining and monitoring its own and the Company's compliance program, had expanded over time as a result of regulatory, market and other developments. In this regard, they considered the Investment Adviser's preparation with respect to the COVID-19 pandemic and ongoing reporting modernization efforts.

The Investment Adviser's services in coordinating and overseeing the activities of the Company's other service providers, as well of the services provided under the Shared Services Agreements, were also considered. The Board also evaluated the expertise and performance of the personnel of the Investment Adviser who performed services for the Company throughout the year. They also considered the quality of the Investment Adviser's compliance oversight program with respect to the Company's service providers. The Board also considered both the investment advisory services and the nature, quality and extent of any administrative and other non-advisory services, including shareholder servicing and distribution support services that are provided to the Company and its shareholders by the Investment Adviser and its affiliates, as well as considered the services provided under the Shared Services Agreements. The Board noted that the level and quality of services to the Company by the Investment Adviser and its affiliates had not been materially impacted by the Highland Capital Management L.P. ("HCMLP") bankruptcy and took into account the Investment Adviser's representations that the level and quality of the services provided by the Investment Adviser and their affiliates, as well as of those services currently being provided by HCMLP pursuant to the Shared Services Agreement, would continue to be provided to the Company at the same or higher level and quality.

The Board also considered the significant risks assumed by the Investment Adviser in connection with the services provided to the Company, including entrepreneurial risk and ongoing risks including investment, operational, enterprise,

ADDITIONAL INFORMATION (unaudited) (continued)

December 31, 2020

litigation, regulatory and compliance risks with respect to the Company. The Board of Trustees also noted various cost-savings initiatives that had been implemented by the Investment Adviser with respect to the Company and the other funds in the Highland complex over the years. The Board also considered the financial condition and operations of the Investment Adviser during the COVID-19 pandemic and noted that there had been no material disruption of the Investment Adviser's services to the Company and that the Investment Adviser had continued to provide the same level, quality and extent of services to the Company.

The Board of Trustees also noted that on a regular basis it receives and reviews information from the Company's Chief Compliance Officer (CCO) regarding the Company's compliance policies and procedures established pursuant to Rule 38a-1 under the Investment Company Act of 1940.

In considering the nature, extent, and quality of the services provided by the Investment Adviser, the Board also took into account its knowledge of the Investment Adviser's management and the quality of the performance of its duties, through discussions and reports during the preceding year and in past years.

The Board took into account the Investment Adviser's risk assessment, monitoring process and regulatory history. The Board concluded that the Investment Adviser had the quality and depth of personnel and investment methods essential to performing its duties under the Advisory Agreement, and that the nature and the quality of such advisory services supported the approval of the Advisory Agreement.

The Investment Adviser's historical performance

In considering the Company's performance, the Board of Trustees noted that it reviews at its regularly scheduled meetings information about the Company's performance results. The Board of Trustees reviewed the historical performance of the Company over various time periods and reflected on previous discussions regarding matters bearing on the Investment Adviser's performance at its meetings throughout the year. The Board of Trustees discussed the performance of the Company and considered the relative performance of the Company and its portfolio management team as compared to that of the Company's peer group as selected by FUSE, as well as comparable indices. Among other data, the Board of Trustees also received data with respect to the Company's leverage and distribution rates as compared to its peer group. The Board also received a review of the data contained in the FUSE report from representatives of FUSE. The Board of Trustees noted that while it found the data provided by FUSE, the independent third-party data provider, generally useful, it recognized its limitations, including in particular that the data may vary depending on the end date selected and the results of the

NexPoint Strategic Opportunities Fund

performance comparisons may vary depending on the selection of the peer group. The Board of Trustees also took into account management's discussion of the category in which the Company was placed for comparative purposes, including any differences between the Company's investment strategy and the strategy of the funds in the Company's respective category, as well as compared to the peer group selected by FUSE.

Among other data relating specifically to the Company's performance, the Board of Trustees took note of FUSE's explanatory note that the peer group and universe consists of other flexible allocation funds identified by FUSE. The Board then considered that the Company outperformed (based on NAV) its benchmark index, the Credit Suisse Hedge Fund USD Index, and peer group median over the ten-year period ended June 30, 2020; however, it underperformed over the one-, three- and five-year periods ended June 30, 2020. The Board also took into account the unique mandate of the Company as compared to the other funds in its peer group. The Board also took into account management's discussion of the Company's performance and actions taken with respect to the Company, including and the Company's ongoing conversion to a real estate investment trust. The Board also took into account potential additional actions proposed to be taken to address the discount with respect to the Company.

The Board of Trustees concluded that the Company's overall performance and other relevant factors, including the Investment Adviser's actions to address any underperformance, supported the continuation of the Agreement with respect to the Company for an additional one-year period.

The costs of the services to be provided by the Investment Adviser and the profits to be realized by the Investment Adviser and its affiliates from their relationship with the Company

The Board of Trustees also gave consideration to the fees payable under the Agreement, the expenses the Investment Adviser incurs in providing advisory services and the profitability to the Investment Adviser from managing the Company, including: (1) information regarding the financial condition of the Investment Adviser; (2) information regarding the total fees and payments received by the Investment Adviser for its services and, with respect to the Investment Adviser, whether such fees are appropriate given economies of scale and other considerations; (3) comparative information showing (a) the fees payable under the Agreement versus the investment advisory fees of certain registered investment companies and comparable funds that follow investment strategies similar to those of the Company and (b) the expense ratios of the Company

ADDITIONAL INFORMATION (unaudited) (concluded)

December 31, 2020

versus the expense ratios of certain registered investment companies and comparable funds that follow investment strategies similar to those of the Company; and (4) information regarding the total fees and payments received and the related amounts waived and/or reimbursed by the Investment Adviser for providing administrative services with respect to the Company under separate agreements and whether such fees are appropriate. The Board of Trustees took into account the management fee structure, including that management fees for the Company were based on the Company's total managed assets.

Among other data, the Board of Trustees considered that the Company's total net expenses were higher than its peer group median and that its advisory fee was in line with its peer group median. The Board of Trustees took into account management's discussion of the Company's expenses. The Board of Trustees also took into consideration the amounts waived and/or reimbursed, if any, where expense caps or advisory fee waivers had been implemented.

The Board of Trustees also considered the so-called "fall-out benefits" to the Investment Adviser with respect to the Company, such as the reputational value of serving as Investment Adviser to the Company, potential fees paid to the Investment Adviser's affiliates by the Company or portfolio companies for services provided, including administrative services provided to the Company by the Investment Adviser pursuant to separate agreements, the benefits of scale from investment by the Company in affiliated funds, and the benefits of research made available to the Investment Adviser by reason of brokerage commissions (if any) generated by the Company's securities transactions. The Board of Trustees concluded that the benefits received by the Investment Adviser and its affiliates were reasonable in the context of the relationship between the Investment Adviser and the Company.

After such review, the Board of Trustees determined that the profitability to the Investment Adviser and its affiliates from their relationship with the Company was not excessive.

NexPoint Strategic Opportunities Fund

The extent to which economies of scale would be realized as the Company grows and whether fee levels reflect these economies of scale for the benefit of shareholders

The Board considered the effective fee under the Advisory Agreement for the Company as a percentage of assets at different asset levels and possible economies of scale that may be realized if the assets of the Company grow. The Board noted that the Company does not currently contain breakpoints in its advisory fee schedule. The Board considered the Investment Adviser's discussion of the Company's advisory fee structure.

The Board also noted that the Company's contractual advisory fee is in line with its peer universe at all asset levels. The Board of Trustees concluded that the fee structures are reasonable, and with respect to the Investment Adviser, should result in a sharing of economies of scale in view of the information provided. The Board determined to continue to review ways, and the extent to which, economies of scale might be shared between the Investment Adviser on the one hand and shareholders of the Company on the other.

Conclusion

Following a further discussion of the factors above, it was noted that in considering the approval of the Advisory Agreement, no single factor was determinative to the decision of the Board of Trustees. Rather, after weighing all factors and considerations, including those discussed above, the Board of Trustees, including separately, the Independent Trustees, unanimously agreed that the Advisory Agreement, including the advisory fee to be paid to the Investment Adviser, is fair and reasonable to the Company in light of the services that the Investment Adviser proposes to provide, the expenses that it incurs and the reasonably foreseeable asset levels of the Company.

- 1 On an annual basis, as a matter of Board policy, the Governance and Compliance Committee reviews each Trustee's performance and determines whether to extend each such Trustee's service for another year. Effective June 2013, the Board adopted a retirement policy wherein the Governance and Compliance Committee shall not recommend the continued service as a Trustee of a Board member who is older than 80 years of age at the time the Governance and Compliance Committee reports its findings to the Board.
- 2 In light of certain relationships between Mr. Honis and historically affiliated entities of the Adviser, including HCMLP, arising out of HCMLP's pending Chapter 11 proceedings, Mr. Honis is treated as an Interested Trustee of the Trust effective January 28, 2020. From May 1, 2015 to January 28, 2020 Mr. Honis was treated as an Independent Trustee of the Trust.

This report has been prepared for shareholders of NexPoint Strategic Opportunities Fund (the “Company”). The Company mails one shareholder report to each shareholder address. If you would like more than one report, please call shareholder services at 1-866-351-4440 to request that additional reports be sent to you.

A description of the policies and procedures that the Company uses to determine how to vote proxies relating to its portfolio securities, and the Company’s proxy voting records for the most recent 12-month period ended December 31, are available (i) without charge, upon request, by calling 1-866-351-4440 and (ii) on the Securities and Exchange Commission’s website at <http://www.sec.gov>.

The Company files its complete schedule of portfolio holdings with the SEC for the first and third quarters of each fiscal year on Form N-PORT within 60 days after the end of the period. The Company’s Forms N-PORT are available on the SEC’s website at <http://www.sec.gov>. Shareholders may also obtain the Form N-PORT by visiting the Company’s website at www.nexpointgroup.com.

On June 18, 2019 and July 15, 2020, the Company submitted a CEO annual certification to the New York Stock Exchange (“NYSE”) on which the Company’s principal executive officer certified that he was not aware, as of the date, of any violation by the Company of the NYSE’s Corporate Governance listing standards. In addition, as required by Section 302 of the Sarbanes-Oxley Act of 2002 and related SEC rules, the Company’s principal executive officer and principal financial officer made quarterly certifications, included in filings with the SEC on Forms N-CSR and N-PORT relating to, among other things, the Company’s disclosure controls and procedures and internal controls over financial reporting, as applicable.

The Statement of Additional Information includes additional information about the Company’s Trustees and is available upon request without charge by calling 1-866-351-4440.
