

NEXPOINT

Q2 2022 COMMENTARY

NexPoint Merger Arbitrage Fund

Second Quarter Commentary 2022

The NexPoint Merger Arbitrage Fund (the “Fund”) (Class Z shares) returned 0.26% in the second quarter of 2022. By month, the Fund returned -0.05%, 0.20%, and 0.11% in April, May, and June, respectively. In comparison, during the second quarter the HFRI Merger Arbitrage Index returned -2.86%, the S&P Merger Arbitrage Index returned -2.42%, the S&P 500 returned -16.11%, and the Bloomberg Barclays Aggregate Bond Index returned -4.69%.

There were no significant contributors to returns during the quarter. The largest detractor to returns was the Fund’s position in the acquisition of Anaplan (PLAN) by Thomas Bravo, LLC which detracted from returns by ~-0.09%. The detraction resulted from a reduction in the merger consideration by Thomas Bravo due to the board awarding employee stock options more than the agreed upon amount. Prior to shareholder vote, the Definitive Merger Agreement (DMA) was amended to reduce the merger consideration to \$63.75 per share from \$66.00 per share. This was a rare and unanticipated event – it is rare for deals to amend the consideration after the initial DMA is released.

The second quarter, like last quarter, was eventful with respect to geopolitical and macroeconomic factors. Markets began the year under pressure stemming from concerns around rising inflation, stretched equity valuations, and the prospect of rising interest rates. Geopolitical pressure continued into Q2 as the Russia and Ukraine conflict persist; resulting in backlash of economic sanctions that drove crude oil prices above \$100 a barrel for the first time since 2014. This oil supply shock added to the fears that already existed in the market around rising inflation. Since Q1, the Fed has increased the Fed Funds Rate twice: 0.50% in May and 0.75% in June. The current Fed Funds Rate at the end of Q2 is 1.75%

We generally think that a merger arbitrage strategy is relatively insulated from macroeconomic and geopolitical risks due to the transactional nature of deals. We would also note that merger arbitrage strategies have historically demonstrated better performance during periods of rising interest rates, which tend to be correlated with a healthy economy and increased deal flow. However, periods of extreme market pressure and geopolitical risks can at times influence certain deals and we strive to get ahead of these movements as best we can. While the Fund was able to generate positive absolute returns in each of the first two quarters, by late Q1 we began seeing signs in both the equity and credit markets that suggested we may be in for a period of heightened volatility. In having an investment philosophy focused on generating absolute returns, we hold that there are times when it is in the best interests of the Fund to seek to minimize drawdowns as well as mark-to-market risks. Our risk management process determined that this scenario called for such action, and we accordingly made the decision to maintain exposure below historic levels and to move out of certain deals. Toward the end of Q2, we slowly started to increase our exposure, but remained below historical levels. We are opportunistically adding positions to replace closed deals and are taking advantage of market downdrafts to increase our exposure in attractive deals with appropriate risk adjusted returns. We are favoring deals with attractive spreads despite having cleared regulatory hurdles and are near closing.

The Fund remains up 0.58% on a year-to-date basis. It is also worth noting that our benchmark, the Bloomberg Barclays Aggregate Index just suffered its worst two quarters since 1980 with a -10.35% return to start the year and is now in the depths of a -11.91% drawdown that dates back to July of 2020; over that time period the Fund has returned a positive 9.98%.

We would like to thank our shareholders for their continued support of the fund. We take our fiduciary responsibilities very seriously and continuously strive to provide our shareholders with high-quality performance.

RETURNS (AS OF 6/30/22)

| SHARE CLASS/ INDEX | YTD | 1-YR | 3-YR | 5-YR | Since Incept. ² |
|-----------------------|--------|--------|-------|-------|----------------------------|

FEES AND EXPENSES

Gross: Class A: 2.70%, Class C: 3.35%, Class Z: 2.35%; Net: Class A: 2.33%, Class C: 2.98%, Class Z: 1.98%

Class A Max Sales Charge: 5.50%. Class C Contingent Deferred Sales Charge ("CDSC") is 1% within the first year from each purchase. Performance results reflect the contractual waivers and/or reimbursements of fund expenses by the Advisor. Absent this limitation, performance results would have been lower. The Expense Cap will continue through at least October 31, 2022 and may not be terminated prior to this date without the action or consent of the Fund's Board of Trustees.

RISK CONSIDERATIONS

Before investing in the Fund, you should carefully consider the Fund's investment objectives, risks, charges and expense. For a copy of a prospectus or summary prospectus, which contains this and other information, please visit our website at nexpoint.com or call 1-833-697-7253. Please read the fund prospectus carefully before investing.

On May 12, 2016, the Predecessor Fund transferred its assets to the Fund in exchange for the Fund's Class Z shares. The investment policies, objectives, guidelines and restrictions of the Fund are in all material respects equivalent to those of the Predecessor Fund. In addition, the Predecessor Fund's portfolio manager is the current portfolio manager of the Fund. As a mutual fund registered under the 1940 Act, the Fund is subject to certain restrictions under the 1940 Act and the Internal Revenue Code of 1986, as amended (the "Code") to which the Predecessor Fund was not subject. Had the Predecessor Fund been registered under the 1940 Act and been subject to the provisions of the 1940 Act and the Code, its investment performance could have been adversely affected, but these restrictions are not expected to have a material effect on the Fund's investment program.

Derivatives Risk. Derivatives, such as futures and options, are subject to the risk that changes in the value of a derivative may not correlate perfectly with the underlying asset, rate or index. Derivatives also expose the Fund to the credit risk of the derivative counterparty. Derivative contracts may expire worthless and the use of derivatives may result in losses to the Fund. **Leverage Risk.** Leverage may increase the risk of loss, cause fluctuations in the market value of the Fund's portfolio to have disproportionately large effects or cause the NAV of the Fund generally to decline faster than it would otherwise. **Micro, Small and Mid-Cap Securities Risk.** Investments in securities of companies with micro, small or medium capitalizations involve certain risks that may differ from, or be greater than, those for larger companies, such as higher volatility, lower trading volume, fewer business lines and lack of public information. **Non-Diversification Risk.** As a non-diversified fund, the Fund may invest a larger portion of its assets in the securities of one or a few issuers than a diversified fund. A non-diversified fund's investment in fewer issuers may result in the fund's shares being more sensitive to the economic results of those issuers. An investment in the Fund could fluctuate in value more than an investment in a diversified fund. **Non-U.S. Securities Risk.** Investments in securities of non-U.S. issuers involve certain risks not involved in domestic investments (for example, expropriation or political or economic instability). **Short Sales Risk.** The risk of short sales theoretically involves unlimited loss potential since the market price of securities sold short may continuously increase. **Hedging Risk.** Although intended to limit or reduce investment risk, hedging strategies may also limit or reduce the potential for profit. There is no assurance that hedging strategies will be successful.

Index Definitions:

Index returns assume reinvestment of all dividends and distributions, if any. Indices are unmanaged, have no fees or costs and are not available for investment. The performance of the indices may be materially different from the Fund's performance. In addition, the Fund's holdings may differ significantly from the securities that comprise the indices. The indices have not been selected to represent an appropriate benchmark to compare a fund's performance, but rather are disclosed to allow for comparison of the Fund's performance to that of certain well-known and widely recognized indices. It is not possible to invest directly in an index.

Barclays US Aggregate Index. Barclays Capital Aggregate Bond Index, which used to be called the "Lehman Aggregate Bond Index," is a broad base index, maintained by Barclays Capital, which took over the index business of the now defunct Lehman Brothers, and is often used to represent investment grade bonds being traded in United States. Index funds and exchange-traded funds are available that track this bond index

S&P 500 Index. S&P 500 Index is an index of a basket of 500 stocks designed to provide a broad snapshot of the overall U.S. equity market. Criteria for inclusion: U.S. Company, market capitalization must be in excess of US\$ 3 billion, public float of at least 50%, financial viability, adequate liquidity and

reasonable price, sector balance, and company type. Ordinary cash dividends are applied on the ex-date in calculating the total return series. "Special dividends" are those dividends that are outside of the normal payment pattern established historically by the issuing corporation. The total return index series reflect both ordinary and special dividends.

HFRI Merger Arbitrage Index. The HFRI Merger Arbitrage Index consists of strategies which employ an investment process primarily focused on opportunities in equity and equity related instruments of companies which are currently engaged in a corporate transaction. Merger Arbitrage involves primarily announced transactions, typically with limited or no exposure to situations which pre-, post-date or situations in which no formal announcement is expected to occur. Opportunities are frequently presented in cross border, collared and international transactions which incorporate multiple geographic regulatory institutions, with typically involve minimal exposure to corporate credits. Merger arbitrage strategies typically have over 75% of positions in announced transactions over a given market cycle.

S&P Merger Arbitrage Index. The S&P Merger Arbitrage Index seeks to provide a risk arbitrage strategy that exploits commonly observed price changes associated with a global selection of publicly announced mergers, acquisitions and other corporate reorganizations. Historically, the index has exhibited market neutral characteristics, lower volatility compared to the S&P 500, and a low correlation to S&P 500 returns.

Index returns are for illustrative purposes only and do not represent actual Fund performance. Index returns do not reflect any management fees, transaction costs or expenses. Indexes are unmanaged and one cannot invest directly in an index. Past performance does not guarantee future results.

HFM US Performance Awards 2020 and 2021 are awarded annually and to be eligible for an award, funds entering any of the categories must apply and meet certain requirements. For funds entering any of the categories except the newcomer categories must submit a 3-year track record of monthly performance data through June 2020 and 2021. Funds entering the long-term performance (5 years) categories must submit a 5-year track record of monthly performance data through June 2020 and 2021. There were 3 funds shortlisted in the Merger Arbitrage category, 8 funds shortlisted in the US Equity Long-term performance (5 years) under \$1bn category, and 6 funds shortlisted in the Event Driven under \$1bn category. Judges focus on absolute performance as well as standard deviation of returns and outperformance of the relevant HFM benchmark. They also take into consideration the relative AUM, nature of the investment strategy, track-records, other supporting materials and professional knowledge they have about shortlisted funds to come to their decisions. Source: 1. Novus. Prepared by NexPoint Securities, Inc., Member FINRA/SIPC.

Sharpe Ratio: Sharpe Ratio indicates the reward per unit of risk by using standard deviation and excess return. The higher the Sharpe ratio, the better the fund's historical risk-adjusted performance.
